covers well established applications as well as new trends in this field Hot topics such as sample preparation for speciation  
metabolomics and halogen determination as well as the alternatives of sample preparation for special samples for example  
carbon nanotubes polymers petroleum products are also discussed The use of microwaves in sample preparation has  
increased in recent decades Several applications of microwaves for sample preparation can be found in the literature for  
practically all types of sample matrices especially for the determination of trace elements by atomic spectrometric techniques  
safely and cleanly reducing the time involved in this step Microwave assisted sample preparation is not only a tool for  
research but also for routine analysis laboratories the state of the art in sample preparation in trace element analysis This  
book is the only resource for chemists specifically focused on this topic The first book to describe the principles equipment
