throughout the whole process of test development experts from state admission and licensure tests will address test fairness challenges in the new generation assessment The book chapters clarify misconceptions of test fairness including the use of admission test results in cohort comparison the use of international assessment results in trend evaluation whether standardization and fairness necessarily mean uniformity when test takers have different cultural backgrounds and whether standardization can insure fairness More technically chapters also address issues related to how compromised items and test fairness are related to classification decisions how accessibility in item development and accommodation could be mingled with technology how to assess special populations with dyslexia using Blinder Oaxaca Decomposition for differential item functioning detection and differential feature functioning in automated scoring Overall this book addresses test fairness issues in state assessment college admission testing international assessment and licensure tests Fairness is discussed in the context of culture and special populations Further fairness related to performance assessment and automated scoring is a focus as well This book provides a very good source of information related to test fairness issues in test development in the new generation of assessment where technology is highly involved
