Multinational Companies, Knowledge and Technology Transfer Alper Sönmez,2013-12-18 This book provides evidence on how FDI leads to knowledge and technology transfers towards domestic firms by paying attention to the role of multinational companies The author presents a comprehensive empirical research conducted at firm level in the Turkish automotive industry Using a representative sample of face to face in depth interviews with top executives and a survey of top level managers of domestic suppliers the research analyzes the existence channels intensity and determinants and the kind of transfers that occur at both inter and intra firm level in the industry The author contends that policies aimed at attracting FDI flows should be re examined under the findings and insights of this study since it is a necessary although not sufficient condition to have an efficient absorptive capacity level and or skilled human capital stock in order to benefit from these flows This study has policy implications for the automotive industry as well as practical recommendations for the public institutions and top executives in emerging country companies and multinationals in order to conceive and implement science and technology policies in supporting the knowledge transfers **Domesticating Neo-Liberalism** Alison Stenning,Adrian Smith,Alena Rochovská,Dariusz Świątek,2011-06-20 Based on in depth research in Poland and Slovakia Domesticating Neo Liberalism addresses how we understand the processes of neo liberalization in post socialist cities Builds upon a vast amount of new research data Examines how households try to sustain their livelihoods at particularly dramatic and difficult times of urban transformation Provides a major contribution to how we theorize the geographies of neo liberalism Offers a conclusion which informs discussions of social policy within European Union enlargement **The Creators of Inside Money** D. Gareth Thomas,David S. Bywaters,2021-07-07 This second edition updates and extends the original foundations of the loanable funds model It develops a new monetary model of inside money which is created by the commercial or retail banks drawing on the events of 2007-08 that led to the Great Recession and fragile economy of today Coronavirus is likely to cause another downturn of economic activity from the perspective of late 2020 as this is written That will represent a long period of subpar anaemic growth which has not been satisfactorily explained by the traditional theory in the form of neo classical analysis The reason may lie with the adoption of a body of theory based primarily on a barter system of exchange but sometimes with one commodity used as money to try to explain a dynamic monetary economy of today Money has evolved from a system of barter to become a medium of exchange based on fiat money and credit currency underpinned by legal tender and therefore a creature of law If households and firms lose confidence in the banking system they can withdraw their deposits in the form of cash as a medium of exchange which must be accepted in exchange for goods and services as legal tender This book highlights the importance of how money is created or destroyed endogenously and derives the loanable

supply of funds in conjunction with the demand within a revised analysis of monetary theory with a new emphasis on portfolio theory It applies critical thinking and the realization of a more precise formulation of the loanable funds theory to final year and postgraduate students in particular with various features systematically added such as the catastrophe framework and Minsky's theory of changing states in an attempt to derive a fully dynamic model There is a new framework using aggregate demand and supply analysis to explain inflation This will be reinforced at each stage by the inclusion of revised and updated case studies graphs and figures to give an international setting and application
