Hesketh, 2024-12-11 This book presents an in depth investigation into street gang involvement desistance and non involvement through the lens of the Risk Factor Prevention Paradigm RFPP This framework encompasses five domains of risk and prevention family neighbourhood peers individual and school It identifies the risk and protective factors that influence young people to either engage in desist or abstain from involvement in deviant street groups Based on a comprehensive five and a half year study the author draws upon his lifelong experience living in Stockbridge Village Merseyside one of the most deprived areas in the UK marked by street gang activity and organised crime The author s unique position allows him to establish a strong rapport with young disenfranchised individuals involved in street gangs This

book offers a comprehensive exploration of critical observations related to street gang involvement by integrating insights that provide a nuanced understanding of the sociocultural factors that both drive individuals toward gang involvement and contribute to their desistance from it. The author highlights key topics including the practice of drug dealing as deviant entrepreneurship, the role of friendship networks in determining engagement in street gang related activities, the allure of risk as a motivator for involvement, and the participation of young women through relationships with young men associated with street gangs. Ultimately, the work offers fresh perspectives on both gang membership and non membership, advocating for the development of homegrown interventions rooted in social capital through bridging and social mobility as viable strategies for addressing street gang involvement.

Handbook of Research on Managing the Urban-Rural Divide Through an Inclusive Framework Popoola, Ayobami Abayomi, Magidimisha-Chipungu, Hangwelani Hope, Chipungu, Lovemore, 2023-02-10. In recent years, the growing disparities between rural and urban areas in developing countries have been a cause of major concern. The rural-urban gap remains the single most well-documented development and welfare disparity in the developing world. This gap can be seen in the low economic activities, higher poverty levels, and lower quality infrastructure and services in rural areas as opposed to urban areas. While the magnitude of this rural-urban divide is well-documented, very little has been documented about its impact on inclusive and sustainable urban development. The Handbook of Research on Managing the Urban-Rural Divide Through an Inclusive Framework aims to capture the spatial and socio-economic divide between rural and urban areas and provides a road map to revamping the discussion that surrounds the urban-rural sphere. Covering key topics such as development, food security, and rural regions, this premier reference source is ideal for policymakers, government officials, industry professionals, researchers, academicians, practitioners, scholars, instructors, and students.
