

Truss: when static analysis is performed

- 1. Choose all joints with proper condition of equilibrium (the joint supports are chosen and taken into account for equilibrium).
- 2. Write all equations.
- 3. If the truss reaction forces a leg must be different, instead of using it differently, write down the joint reaction and reaction forces and all equations and all of the joints.

- 4. In static equilibrium, the full leg of the truss is supported by the reaction forces and the reaction forces are supported by the reaction forces.

- a. Write and describe the reaction forces and the reaction forces at the joint.
- b. Write the reaction forces and the reaction forces at the joint.

- c. Calculate the magnitude of the reaction forces and the reaction forces at the joint and the reaction forces at the joint.
