As described in the cover memo, a group of CMER members has been working for over a year in response to TFW Policy's motion to review the Washington Farm Forestry Association (WFFA)-sponsored SFLO Template Scientific Justification (SJ) and supporting documents (See attached CMER cover memo). CMER was given three documents by Policy, including the SJ, a review of this document by Mark Teply of Cramer Sciences (hereafter, Teply review), and an ISPR assessment of the Teply review (hereafter, ISPR review). The group made a good faith effort to come to a mutually acceptable agreement on the scientific merits, assessment and interpretation of information provided by the SJ, the Teply review of the SJ, and the ISPR review of the Teply review. Despite these efforts, we could not agree on many of the substantive issues.

CMER members were not able to come to consensus on how to use the information in the Teply review to answer questions 4a and 4b in the CMER Answers to 6 Questions document. Group members found that the Teply review contained contradictory information, and it was not clear to some group members the extent to which ISPR comments addressed the science in the SJ or in Teply's review of that science. There was no opportunity for group members to discuss these issues with Teply or with the ISPR reviewers, and ultimately the full group was not able to come to agreement on how to interpret the various findings. As a result, CMER members found it difficult to engage in substantive discussions on the technical merits of the SFLO prescriptions based on Teply's review of those prescriptions. Additional attempts to come to a mutual agreement about an overall understanding of the context and utility of the information provided were also unsuccessful. Ultimately, these factors prevented resolution of disagreements regarding what the SJ and supporting documents told us and did not tell us about the proposed SFLO riparian buffer prescriptions.

The following is a summary of the large-scale issues that were seen by the CMER participants listed above as obstacles to consensus regarding a technical summary of the information. These include issues with the (1) type of documents provided, (2) the uncertainty of assessments within the SJ, (3) the scope of inference needed to reach a defensible conclusion, and (4) the role that newer data might have played if it had been used to update the document during the seven years since the SFLO Template Proposal was originally submitted to Policy for review.

Documents

The SJ was written based on a limited literature review and contained an un-validated, modeled analysis of shade. Neither un-validated models nor limited literature reviews meet the scientific merits for considering non-CMER science in the AMP (Use of Non-CMER Science in the Forest Practices Adaptive Management Program, 2013).

The SFLO template proposal did not follow CMER's project development, literature review, scoping, best available science, alternatives analysis or QA/QC process outlined in the CMER Protocols and Standards Manual and referenced in DNR's adaptive management board manual (Section 22). Additionally, the author never revised his report in response to the Teply review.

Model United Nations Simulations and English as a Lingua Franca Donna Tatsuki,Lori Zenuk-Nishide,2021-09-22

One of the most important 21st century skills is the ability to negotiate constructive resolutions in the face of conflicts of interest. Negotiation is a form of communication that requires more than just language ability. It requires being able to listen to and communicate with others within a milieu of diverse language abilities, academic, professional, and cultural backgrounds in an increasingly global society. Added to this is the reality that the majority of English spoken globally is English as a Lingua Franca (ELF). Model United Nations (MUN) simulations are uniquely positioned to help students develop their language ability and their global competencies as well as being ideal opportunities for participants to experience ELF in an intensely communicative context. A common goal in MUN simulations is to prepare students to solve complex problems that are associated with living in a technological, competitive, and globally connected world. This volume provides researchers, negotiation practitioners, and language teachers with insights and best practices in MUN event and delegate preparation. Application of these best practices will significantly enrich the pedagogic environments designed for MUN delegates, especially in ELF contexts.

Some Chairs. Broken Chairs. Yike Guo, 2013-05-14. *Some Chairs Broken Chairs* is a 2013 memoir written by Yike Guo. The author describes in this memoir his own experiences in the most recent two years participating in student conferences simulating the working procedures, negotiations across Europe, notably Model United Nations conferences, Model UN, and simulations of the EU and NATO. He took various roles and travelled to a wide range of countries while managing to also study in his home town. He also possesses a fervent interest in international relations, human rights, diplomacy, art, and cultures among others. This memoir does not only reflect moments that were daunting and frustrating but also those who were exceptionally rewarding and memorable. The author decided to immortalize some of the prominent and best moments in his life until then in this book. However, for many reasons, though he worked hard on it, he could not cover everything in greater depth. The author provided more fragments of personal collection, full of memories, anecdotes, and expositions but also some stories behind the scenes, expectations, and realities, comedies, and tragedies, and about his job rather than a patterned guidebook for everyone. Yike Guo wrote about some people who inspired and changed him and gave insights to people wishing to find out more about what a Model conference is, looking like, what one could learn, and which motivation he had. The memoir contains also a great range of selections of position papers, articles, and post-conference reports by his friends, presenting the readership a different view than the author's own. Starting with his first conference two years ago, the author mostly chronologically listed his journeys and events and ended in April 2013, having gone and thrived at some twenty of the most prestigious and meritorious European conferences, projects, and dialogues.

The Principle of Proportionality, Solvency II and Captives Marta Ostrowska, 2025-03-05 This book offers an in depth analysis of the principle of proportionality in the EU insurance regulatory regime It takes a critical look at how proportionality has been implemented in Solvency II and tests its effectiveness on captive re insurance undertakings Given their unique business model captives are considered the primary beneficiary of proportionality and therefore offer the perfect litmus test for the principle's effectiveness In a world characterized by overregulation and increasingly complex financial markets governments and policymakers face the challenge of regulating markets without hindering their growth As one size fits all approaches have long since been recognized as detrimental the EU is seeking to develop a regulatory technique which allows more individual regulatory treatment while ensuring a level playing field The first revolutionary step towards this goal was taken in Solvency II Directive 2009/138/EC which introduced a principle of proportionality to the EU insurance market The principle is a unique tool which makes it possible to adjust the requirements of the Solvency II framework to the nature scale and complexity of each individual insurance undertaking's risk profile It is intended to help remove an unnecessary regulatory burden for insurance undertakings and to prevent the proliferation of regulations in general However the practical implementation of proportionality is not without its share of obstacles The principle's generic nature and the lack of guidance have caused a great deal of confusion regarding its practical application and prevented insurance undertakings from using

its benefits to the fullest Consequently the principle of proportionality has been subject to revision within the first Solvency II review process The book will benefit captive owners captive managers regulators supervisors practitioners academics students and more generally all those involved with or interested in the insurance market *Connecting the Dots* Ronald S.
