The Secret Of Perfect Vision:

The Secret of Perfect Vision David De Angelis,2011-10-25 A revolutionary guide to treating nearsightedness and achieving optimal vision health through exercises that strengthen the eye muscles Author David De Angelis s search for a cure for nearsightedness was both professional and personal since he suffered from the disease himself An expert in muscular work dynamics he discovered through extensive testing and an immersion in decades of scientific studies that working the extrinsic ocular muscles could preserve sight and re educate the eyes toward better vision He came to understand the importance of retinal defocus for transforming ocular refractive status In this book the author shares both the science and the secret of how he was able to reverse his own myopia progressive retinal defocus technique The system s efficacy he says comes from the fact that it directly intervenes with the causes that generate myopia onset and development overaccommodative near point stress When adequately stimulated by the simple exercises presented in the book ocular refractive capability leads to gradual strengthening of focusing capability and gradual decreasing of refractive error Written in straightforward language and featuring an extensive section on the scientific research in this field The Secret of Perfect Vision offers a proven program of healing to the millions of people afflicted with this condition [Perfect Vision Diet - The Secret to 20/20 Eyes](#) M. Zuraw,Robert T. Lewanski,2010-06 The Miracle of Perfect Eyesight The Truth About The Eyes It is said that the eyes are the windows of the soul How clear is your vision Can you see the world without blurry vision or distortion The so called normal eye can easily read the 20 foot line on the Snellen Eye Test Chart at 20 feet away this is called 20 20 vision There is no limit as to how much one can improve their vision beyond the 20 20 range Healthy eyes are a marvel of nature s creation A person with above average eyesight can easily read the 10 foot line smallest bottom line on the Snellen Eye Test Chart at 20 feet away 20 10 vision I have seen people who can read the 10 foot line at 50 to 60 feet away 60 10 vision This is called telescopic vision There is also no limit to reading small Microscopic Type Print known as micro scopic vision There is no limit to how sharp and clear one can see in the distance and close up We are all walking talking seeing miracles of Great Nature The sages say human beings are solidified sunlight or trails of light because our eyesight and our very life is totally dependent on the Solar Orb We would all become blind without the healing rays of sunlight upon our retina Sunlight also gives us natural Vitamin D for healthy skin and eyes The eye training secrets contained in this book have taken me from 20 600 progressive advanced myopia or blind without glasses to better than 20 20 vision If you practice and are persistent in your eye training

you too can improve vision quickly Eye Muscles Accommodation The Mystery Unveiled In order to see properly the eyes must accommodate Accommodation takes place when focusing on various distances close and far Which muscles are doing the focusing during accommodation is debatable among Ophthalmologists Dr Helmholtz an early eye doctor found that only the ciliary eye muscles do the accommo dating The Helmholtz Theory is the accepted belief of most modern eyeglass doctors Dr Bates a natural eye specialist felt that the two oblique eye muscles performed eye accommodation by compressing the round eyeball in the middle and making it longer horizontally Dr Bates cut these muscles in rabbits and found the eyes could not accommodate When he injected a drug to paralyze the oblique muscles the eyes failed to accommodate When he put together the severed muscles and washed out the drug the rabbit s eyes were able to accommodate again The Helmholtz theory holds that accommodation is due to the expansion and contraction of the crystalline lens caused by the action of the ciliary muscle Dr Bates through his experiments discovered and proved that it is not the crystalline lens but the six external muscles that act upon the eyeball and give the eye its ability to adjust and accommodate to near and far objects The fact that patients who have had the crystalline lens removed are still able to see and have the power to accommodate should be convincing proof of this theory It is obvious both the oblique muscles and the ciliary muscles work in conjunction when focusing Here is the reason why the normal eye when looking at a distant object becomes shortened and when looking at a close object is elongated The external muscles oblique recti iris and the ciliary muscles all enable the eyes to accommodate properly The external muscles lengthen and shorten the eyeball to enable light rays to fall upon the macula The iris adjusts the pupil for the amount of light necessary to see clearly And the ciliary muscle contracts the lens to focus upon the object The ciliary muscle changes the lens and directs the rays of light to focus upon the macula or center of sight While looking at a distant object of more than twenty feet away the rays come into the eyes parallel When looking at a close point rays come into the eyes at an angle The normal eye must accommodate these rays in order to see clearly a close or distant point All rays fro

The Art of Cosmic Vision Mantak Chia,Robert T. Lewanski,2010-03-09 How to achieve perfect vision naturally through proven eye training methods Explains how vision problems are related to imbalances in the internal organs Provides Taoist and Ayurvedic practices for harmonizing the liver and kidneys the organs directly associated with eye problems In the West problems with eyesight are treated separately from overall health usually with prescription glasses or contact lenses But Eastern systems of holistic healing view the eyes as mirrors of physical health Eye problems reflect problems with the internal organs most specifically the liver and kidneys The Art of Cosmic Vision offers Taoist healing sound exercises for strengthening the liver and kidneys as well as seven internal Chi Kung exercises and Dao Yin self massage practices for toning the organ meridians It also provides extensive dietary recommendations including a complete Ayurvedic analysis of the three main nutritional body types The wide variety of eye strengthening exercises in The Art of Cosmic Vision includes the Egyptian Black Dot technique the Taoist Long Swing technique the Tai Chi Rocker Eye technique and relaxing Yoga Eye

Palming techniques Rather than viewing the ciliary muscle within the eye as the only muscle responsible for focus these exercises improve focus by training all of the muscles surrounding the eyes With attention to improved diet physical exercise and these proven eye training techniques readers can restore their vision to vibrant health **Night Vision Roadmap**

R. Brooks Simpkins,2019-03-12 There is not any mystery about the eyes when you are told something about them I have endeavoured to write this little book in a manner resembling a fireside chat There are not any diagrams and neither are there any technical terms other than to call some parts of the eyes by their actual names It has not been easy to portray rather complicated knowledge in simple words but I hope that my readers will find my descriptions easy to read and helpful also In those days after enjoying normally good sight as a boy I had become very shortsighted and intensely disliked having to wear glasses Gradually over the years the urge developed to investigate the true reason for my having to do so and I recalled that when as an early teenager I rebelled against the decision of an eminent ophthalmic surgeon to prescribe my first pair of glasses he generously admitted to me that much was not yet known about the eyes The urge to become an independent research worker grew and eventually became so strong that I cast all else aside to respond to its beckoning My authority for writing what I have written in the pages that follow is not supported by conventional diplomas of qualification but instead it is provided by more than thirty years experience employing new approaches to affections of the eyes and defective vision and applying advanced methods of remedial treatment to the eyes of children and men and women of all ages The secrets behind the secret

Darwin Reid Payne,1993 In this enlarged and thoroughly revised third edition of his widely used text Darwin Reid Payne explores the principles and philosophies that shape the visual elements of theatre Payne sets out to discover who scenographers are and to define their responsibilities He sees scenographers as not merely craftspersons but artists with a special vision that spans all the arts Such artists are in a position to extend and amplify underlying meanings of the production The proper goal of beginning scenographers according to Payne is one day to be able to approach the job as artists in full command of their craft Payne seeks to instill in beginning scenographers a basic core of knowledge an understanding of theatre history and the development of drama a knowledge of art history and an understanding of periods and styles of architecture painting sculpture furnishings and costume and a familiarity with the principles techniques and materials of pictorial and three dimensional design This new edition contains 248 illustrations 38 more than the second edition Payne s goal certainly is to teach students what to do and how to do it equally important however is Payne s view that scenographers must know why To Payne Scenography is an art whose scope is nothing less than the whole world outside the theatre Scenographers must read not only in their own field but in others as well Payne has incorporated into his text many suggestions for outside readings quoting passages and even entire chapters from important works Stressing research Payne

argues that without knowledge of the literature of their own and related arts scenographers cannot grow And that is the emphasis of this book to present aspiring scenographers with an approach and a set of concepts that will enable them to grow Toward that end Payne establishes five priorities the first of which is to develop in students what he calls time vision or the ability to see the historical past as a living place with living inhabitants The second priority is to bring about an awareness that allows students to see beneath the surface of objects and events Third students must be helped to recognize and appreciate the difference between the concept of space as it exists outside the theatre and the concept of space as it is used within the theatre The fourth priority is to ingrain in students an understanding of the importance of imagery to the scenographer and the final priority is to teach those technical skills necessary to carry out the concepts of the scenographer
