The Social Psychology Of Disability Academy Of Rehabilitation Psychology Series:

The Social Psychology of Disability Dana Dunn, 2015 The book's overarching message is an important one: The experience of most people with disabilities is not what nondisabled persons anticipate; contrary to the latter's beliefs and expectations, the former can lead full and normal lives. Thus, *The Social Psychology of Disability* is designed to counter stereotypical or biased perspectives aimed at an often overlooked minority group. Publisher information

Disability-affirmative Therapy Rhoda Olkin, 2017 Disability Affirmative Therapy (DAT) helps clinicians put the disability of a client into proper focus without making one of the usual mistakes associated with cross-cultural therapy: overinflating the role of the disability or underestimating its profound effects. DAT provides a template for evaluation in nine areas to be discussed with the client that allows understanding of the client's lifetime experiences with disability.

Ableism: The Causes and Consequences of Disability Prejudice Michelle R. Nario-Redmond, 2019-10-01 The first comprehensive volume to integrate social scientific literature on the origins and manifestations of prejudice against disabled people. Ableism (prejudice against disabled people stereotyped as incompetent and dependent) can elicit a range of reactions that include fear, contempt, pity, and inspiration. Current literature often narrowly focuses on a specific aspect of the subject or is limited in scope to psychoanalytic tradition, failing to examine the many origins and manifestations of ableism. Filling a significant gap in the field, *Ableism: The Causes and Consequences of Disability Prejudice* is the first work to synthesize classic and contemporary studies on the evolutionary, ideological, and cognitive/emotional sources of ableism. This comprehensive volume examines new manifestations of ableism, summarizes the state of research on disability prejudice, and explores real-world personal accounts and interventions to illustrate the various forms and impacts of ableism. This important contribution to the field combines evidence from multiple theoretical perspectives, including published and unpublished work from both disabled and nondisabled constituents, on the causes, consequences, and elimination of disability prejudice. Each chapter places findings in the context of contemporary theories, identifying methodological limits and suggesting alternative interpretations. Topics include the evolutionary and existential origins of disability prejudice, cultural and impairment-specific stereotypes, interventions to reduce prejudice, and how to effect social change through collective action and advocacy. Adopting a holistic approach to the study of disability prejudice, this accessibly written volume provides an inclusive, up-to-date exploration of the origins and expressions of ableism. Addresses how to resist ableist practices, prioritize accessible policies, and create more equitable social relations, with pages earmarked for activists and allies. Focuses on interpersonal and intergroup analysis from a social psychological perspective. Integrates research from multiple disciplines to illustrate critical cognitive, affective, and behavioral mechanisms and manifestations of ableism. Suggests future research directions based on topics covered in each chapter. *Ableism: The Causes and Consequences of Disability Prejudice* is an important resource for social community and rehabilitation psychologists, scholars, and researchers of disability studies, and students, activists, and academics across

political sociological and humanistic disciplines This book is an excellent resource for both members of the academic field and lay readers seeking to know more about disability prejudice and ways to address it Charlotte Schreyer Syracuse University Published on H Disability September 2022 *Understanding the Experience of Disability* Dana S. Dunn, 2019-04-30 Rehabilitation psychologists have long argued that situational constraints e.g. missing ramps lack of Braille signage nondisabled peoples attitudes create greater social barriers and behavioral restrictions for people with disabilities PWDs than do the disabilities themselves In other words as social psychologist Kurt Lewin argued situational factors including the perceptions and actions of other people often have greater impact on the experience of disability than do the personal qualities of PWDs themselves Thus the experience of disability is shaped by a variety of psychosocial forces and factors some of which enhance while others hinder daily living For adequate understanding and to plan constructive interventions psychological science must attend to how the disabled person and the situation interact with one another

Understanding the Experience of Disability Perspectives from Social and Rehabilitation Psychology is an edited book containing chapters written by social and rehabilitation psychologists who study how social psychological theory can inform our understanding of the experience of disability and rehabilitation Chapters are arranged topically into four sections Established areas of inquiry e.g. stigma social biases stereotyping mainstream topics e.g. women culture and race aging emerging issues e.g. implicit attitudes family and parenting issues positive psychology and issues of injustice advocacy and social policy e.g. perceived injustice disability advocacy policy implications Besides informing advanced undergraduate and graduate students and professional researchers practitioners audiences the book will help families and caregivers of PWDs policy makers and PWDs themselves understand the social psychological processes linked to disability *Disability as Diversity* Erin E. Andrews, 2020 *Disability As Diversity* comprehensively addresses disability as diversity and provide a guide for developing cultural competence The text goes beyond disability models and opens a discourse on concepts such as disability identity development and culture and culturally appropriate language assessment and intervention Readers will gain an appreciation of the role of cultural competence on health disparities health promotion and disease prevention for disability across the lifespan *Teaching Disability* Rhoda Olkin, 2021 This book takes a nonpathological approach to disability as part of diversity rather than as a deficiency offering 34 activities to help instructors working with this community The activities are designed to be used in or out of the classroom in independent or group dynamics and can be modified for individual need *Suicide Prevention After Neurodisability* Grahame K. Simpson, Lisa A. Brenner, 2019 Although those with a history of neurodisability are at increased risk for suicide clinicians do not have the necessary knowledge to engage in prevention efforts The information in *Suicide Prevention after Neurodisability* will provide clinicians with the information and tools necessary to screen assess and intervene before it is too late *Motivational Interviewing in Medical Rehabilitation* Nicole Schechter, Connie Jacocks, Lester Butt, Stephen T. Handbook of Clinical Health Psychology C. Green,R. Meagher,T. Millon,2012-12-06 We seek to throw down the gauntlet with this handbook challenging the hegemony of the behavioral medicine approach to the psychological study and treatment of the physically ill This volume is not another in that growing surfeit of texts that pledge allegiance to the doctrinaire purity of behavioristic thinking or conceptualize their subject in accord with the sterility of medical models Diseases are not our focus nor is the narrow band of behavioral assessment and therapy methodologies Rather we have sought to redefine this amorphous yet burgeoning field so as to place it squarely within the province of a broadly based psychology specifically the emerging substantive discipline of health psychology and the well established professionalism and diverse technologies of clinical psychology The handbook s title Clinical Health Psychology reflects this reorientation explicitly and Chapter 1 addresses its themes and provides its justifications more fully In the process of developing a relevant and comprehensive health assessment tool the editors were struck by the failure of clinical psychologists to avail themselves of the rich vein of materials that comprise the psychosocial world of the physically ill Perhaps more dismaying was the observation that this field was being mined less than optimally by physicians and nonclinical psychologists

[Making and Unmaking Disability](#) Julie E. Maybee, 2019-09-16 If the future is accessible as Alisa Grishman one of 55 million Americans categorized as having a disability writes in this book's cover image then we must stop making or

constructing people as disabled and impaired In this brave new theoretical approach to human physicality Julie E Maybee traces societal constructions of disability and impairment through Western history along three dimensions of embodiment the personal body the interpersonal body and the institutional body Each dimension has played a part in defining people as disabled and impaired in terms of employment healthcare education and social and political roles Because impairment and disability have been constructed along all three of these bodies unmaking disability and making the future accessible will require restructuring Western institutions including capitalism changing how social roles are assigned and transforming our deepest beliefs about impairment and disability to reconstruct people as capable Ultimately Maybee suggests unmaking disability will require remaking our world

The Positive Psychology of Personal Factors Dana S. Dunn, Michael L. Wehmeyer, 2022-01-17 Historically interventions designed to impact the lives of disabled people were predicated upon deficits based models of disability This began to change with the introduction of World Health Organization WHO frameworks particularly the International Classification of Function ICF that emphasized that disability could only be understood in the context of interactions among health environmental factors and personal factors and by examining the impact of such factors on a person's activities and participation The ICF identified personal factors as among the elements of a social ecological model of disability but did not provide an extensive taxonomy of what constitutes such factors The Positive Psychology of Personal Factors examines personal factors that come from the field of positive psychology and as such to begin to identify and build strengths based approaches to promoting the full participation dignity and well being of disabled people
