The Aging Experience Cherry Russell, 2024-05-10 Local writing on the subject of old age had tended to a fairly uniform approach focusing on empirical studies of old age as a social problem using census and survey type data Little attention had been paid to theory development Originally published in 1981 this book provides an in depth study of how old age was experienced in contemporary Australian society at the time It was the first major piece of original research on aging to be published in Australia and in several important senses represented a clear departure from the mainstream of Australian gerontology The Aging Experience links original in depth data to a broad theoretical framework Working from the premise that old age is a devalued status it examines the implications of this for the personal experience and interpersonal relations of elderly people Through detailed case studies of elderly Australians their interaction with family age peers and welfare services are described The analysis concentrates less on the overt characteristics of these relationships and their material functions than on their symbolic content and meaning for the participants Thus the study moves beyond conventional statistical documentation of the problems of old age to a sharper delineation of aging as a lived experience It is an approach which offers new perspectives and challenges many of the assumptions underlying previous research

Taking It Big Steven P. Dandaneau, 2001-01-24 For use as a primary or supplemental text for Introductory Sociology Social Theory and senior capstone courses An unabashedly critical text for those who want to connect their students' personal experiences with what is happening at the societal/global level today The emphasis is on teaching the sociological imagination i.e. to instill in students a unique and radical form of consciousness that will allow them to conceptualize today's chief global and individual problems and the relations between them Dandaneau adopts a perspective like that of C Wright

Mills and argues that the sociological imagination is the most needed type of consciousness in the world today The author encourages students to think through a wide variety of topics from ecological crises to panic disorder from hyperreality to the sociology of disability from Generation X to Generation Next As Dandaneau says The point is not so much to learn the truth but to learn how to think about essential issues and troubles as sociologists themselves try to do to become a participant with others in facing down the challenges of our present epoch It is an elegant and profound meditation on thinking sociologically Written with a rare panache one seldom finds in sociology it s the product of a view of contemporary social life that is profoundly troubling What this adds up to is a distinctive sociological and moral voice Peter Kivisto Augustana College Rock Island Illinois
