

Model 2 – Random Sampling Method

- a. According to Model 2, what is the probability of selecting a red die in a random draw out of the bag?

The probability of selecting a red die in a random draw out of the bag is 50% because it is 50%.

- b. Suppose you draw a die from the bag and find it is red. How does this information in a single case impact on the probability of selecting a red die in subsequent draws without replacement?

The probability of selecting a red die is determined by using replacement, not by adding one more red die to the bag. If you draw a red die, you should be more cautious to find the probability of selecting a red die will get other things to find out whether you get and not the same thing again or not.
