Introduction to Sociolinguistics Sharon K. Deckert, Caroline H. Vickers, 2011-05-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society and posits that a crisis of legitimization is at the core of all crises It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system This volume in the Critical Theory and Contemporary Society by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology political theory and law Language and Identities Carmen

Llamas, 2009-12-18 Language and Identities offers a broad survey of our current state of knowledge on the connections between variability in language use and the construction negotiation maintenance and performance of identities at different levels individual group regional and national It brings together over 20 specially commissioned chapters written by distinguished international scholars on a range of topics around the language identity nexus The collection deals sequentially with identities at various levels both social and personal Using detailed empirical evidence the chapters illustrate how the multi layered dynamic nature of identities is realised through linguistic behaviour Several chapters in the volume focus on contexts in which we might expect to observe a foregrounding of factors involved in the definition and delimitation of self and other for example cases in which identities may be disputed changing blurred peripheral or imposed Such a focus on complex contexts allows clearer insight into the identity making and marking functions of language The collection approaches these topics from a range of perspectives with contributions from sociolinguists sociophoneticians linguistic anthropologists clinical linguists and forensic linguists Language and Social Identity John J. Gumperz, 1982 Throughout Western society there are

now strong pressures for social and racial integration but in spite of these recent experience has shown that greater intergroup contact can actually reinforce social distinctions and ethnic stereotypes The studies collected here examine from a broad sociological perspective the sorts of face to face verbal exchange that are characteristic of industrial societies and the volume as a whole pointedly demonstrates the role played by communicative phenomena in establishing and reinforcing social identity The method of analysis that has been adopted enables the authors to reveal and examine a centrally important

but hitherto little discussed conversational mechanism the subconscious processes of inference that result from situational factors social presuppositions and discourse conventions The theory of conversation and the method of analysis that inform the author's approach are discussed in the first two chapters and the case studies themselves examine interviews counselling sessions and similar formal exchanges involving contacts between a wide range of different speakers South Asians West Indians and native English speakers in Britain English natives and Chinese in South East Asia Afro Americans Asians and native English speakers in the United States and English and French speakers in Canada The volume will be of importance to linguists anthropologists psychologists and others with a professional interest in communication and its findings will have far reaching applications in industrial and community relations and in educational practice

The Sociolinguistics of Borderlands Tope Omoniyi, 2004 The central pursuit of this book is to demonstrate the link between language and identity using the Idiroko Igolo community on the Nigerian Benin border It raises issues of identity within a sociolinguistic framework focusing on the ways in which colonial boundaries affected community ethnic and national affiliations and the social and political dynamics of choosing between various identities in these contexts Consisting of seven chapters this is a valuable tool for undergraduates postgraduates and academics interested in African borderlands
