*The Oxford History of the Novel in English* Cyrus R. K. Patell, Deborah Lindsay Williams, 2024-03-05 The Oxford History of the Novel in English is a twelve volume series presenting a comprehensive global and up to date history of English language prose fiction written by a large international team of scholars The series is concerned with novels as a whole not just the literary novel and each volume includes chapters on the processes of production distribution and reception and on popular fiction and the fictional sub genres as well as outlining the work of major novelists movements and tendencies This book offers an account of US fiction during a period demarcated by two traumatic moments the eve of the entry of the United States into the Second World War and the onset of the Covid 19 pandemic The aftermath of the Second World War was arguably the high point of US nationalism but in the years that

followed US writers would increasingly explore the possibility that US democracy was a failure both at home and abroad For so many of the writers whose work this volume explores the idea of nation became suspect as did the idea of national literature as the foundation for US writing Looking at post 1940s writing the literary historian might well chart a movement within literary cultures away from nationalism and toward what we would call cosmopolitanism a perspective that fosters conversations between the occupants of different cultural spaces and that regards difference as an opportunity to be embraced rather than a problem to be solved During this period the novel has had significant competition for the US public's attention from other forms of narrative and media film television comic books videogames and the internet and the various forms of social media that it spawned If however the novel becomes a residual form during this period it is by no means archaic The novel has been reinvigorated over the past eighty years by its encounters with both emergent forms such as film television comic books and digital media and the emergent voices typically associated with multiculturalism in the United States

Postmodernism, Twenty-First Century Culture, and American Fiction Matt Graham, 2024-07-19 Postmodernism's end is a complex and contentious topic Yet one overarching consensus emerges the postmodern has been surpassed This book poses a thought experiment challenging this position what if postmodernism persists within the twenty first century Rather than designate a new epoch or coherent movement this book interrogates the fragmented contradictory and counterintuitive endurance of postmodern aesthetics within post Cold War America An alternative use of postmodern aesthetics becomes possible when they are decoupled from their twentieth century historical location Collectively these repetitions posit a postmodern continuum contrasting the widely called for succession of postmodernism via this decoupling When postmodern aesthetics are no longer unconsciously repeated within their cultural moment this emergent shift within a period after postmodernism presents an alternative historical positioning and use After their cultural vanguard postmodern aesthetics become a confrontation of the chaotic realism of an inescapable post Cold War capitalism tapping into this cultural zeitgeist through literature
