## Queen Charlotte Fushing Report:

**Annual report** Canada. Department of Marine, 1892      *Report* British Columbia. Provincial Fisheries Department, 1957  
Commerce Reports, 1917      *Fishes and Forestry* Thomas G. Northcote, G. F. Hartman, 2008-04-15 Many species of fish occupying inland waters reside in watersheds that were or still are surrounded by forests and are dependent in major ways upon such cover. The interactions between fishes and forests are complex multifaceted dynamic processes involving most inland surface waters, forests, subsurface waters, geology and soils, climate and its changes and the biotic components of the relevant ecosystems. These interactions also include the aspects of forestry tied to human development, economics, population growth and even philosophies. *Fishes and Forestry* is truly a landmark publication. The editors, Professors Northcote and Hartman, have drawn together and carefully edited chapters written by 56 scientists from around the world covering a vast wealth of information never before appearing within the covers of one book. Following an introductory chapter, this exceptional work is broadly divided into sections covering the ecology of forests, streams, lakes and estuaries, fish biology and ecology, forestry activities and their effects on aquatic systems and fishes, 14 chapters covering examples of fish forestry interactions from around the world and a final section covering means of effecting better fish forestry interactions. *Fishes and Forestry* is an essential purchase for all those involved in inland fisheries, forestry and their interaction, including fisheries scientists, fish biologists, ecologists, environmental scientists and forestry scientists. Libraries in all universities and research establishments where these subjects are studied and taught should have several copies on their shelves.      Special Scientific Report, 1959      *Sessional Papers of the Dominion of Canada* Canada.
