SAS Enterprise Guide 1: Querying and Reporting

Training Objectives

This course is for users who do not have SAS programming experience but need to access, manage, and summarize data from different sources, and present results in reports and graphs. This course focuses on using the menu-driven tasks in SAS Enterprise Guide, the point-and-click interface to SAS, to create queries and reports. It does not address writing SAS code or statistical concepts. This course serves as a prerequisite for the [SAS Enterprise Guide 2: Advanced Tasks and Querying](#) course and for the [Creating Reports and Graphs with SAS Enterprise Guide](#) course. It also serves as a prerequisite for the [SAS Enterprise Guide: ANOVA, Regression, and Logistic Regression](#) course, which teaches statistical concepts using SAS Enterprise Guide.

Learn how to

- access and manipulate local and remote data of various types
- create queries that filter and summarize data, compute new columns, and join multiple tables
- create frequency and tabular reports
- create interactive graphs
- automate output results

Who should attend

Data, business, and statistical analysts who licensed or are considering licensing SAS Enterprise Guide or SAS Analytics Pro and would like training to get started with data access, management, and analytics

Pre requisite

This course is designed for users with no programming experience or SAS knowledge. Before attending this course, you should be familiar with Windows and other software, such as Microsoft Office or spreadsheet programs.

This course addresses SAS Enterprise Guide software.

Emerging Perspectives in Big Data Warehousing Taniar, David, Rahayu, Wenny, 2019-06-28. The concept of a big data warehouse appeared in order to store moving data objects and temporal data information. Moving objects are geometries that change their position and shape continuously over time. In order to support spatio-temporal data, a data model and associated query language is needed for supporting moving objects. Emerging Perspectives in Big Data Warehousing is an essential research publication that explores current innovative activities focusing on the integration between data warehousing and data mining, with an emphasis on the applicability to real-world problems. Featuring a wide range of topics such as index structures, ontology and user behavior, this book is ideally designed for IT consultants, researchers, professionals, computer scientists, academicians and managers.
