From publisher's description: **The Princeton Companion to Jewish Studies** Leora Batnitzky, Eve Krakowski, Steven Weitzman, 2025-10-14. An authoritative guide to Jewish studies reflecting the latest research in a diverse and flourishing field. Jewish studies is a dynamic interdisciplinary field that draws on the methods of the modern academy: historical research, anthropology, literary studies, philosophy, religious studies, sociology, feminism, and the study of the arts and culture among others to illuminate the past and present of Jewish life, thought, and expression. This book provides an entry point to Jewish studies for readers who want to learn about the questions it raises and the insights it generates. Although no single volume can capture the full breadth of the field, this Princeton Companion encompasses some of the most important subfields of Jewish studies, presenting new historical research and introductions to the many other disciplines that can be brought to bear on Jewish history and experience. The editors, all distinguished scholars of Jewish studies, have gathered contributions from a range of prominent and up-and-coming figures in the field. These contributors offer original perspectives that reflect new findings and novel contexts. Part I: Rethinking the Past aims to give an overview of recent research trends in the study of Jewish history, covering the ancient world, the Middle Ages, and modern times. Part II: Ideas and Expression surveys new research in the study of Jewish language, religion, philosophy, literature, art, music, and other humanities-centered approaches to Jewish life. Part III: Interactions and Identity brings the social sciences and anthropology into the picture along with Israel studies and Mizrahi studies to introduce the ways scholars today are seeking to shed light on how Jews identify themselves, interact with others, organize themselves, and behave politically and economically. **The Million Person Study of Low-Dose Radiation Health Effects** John D. Boice Jr, André Bouville, Lawrence T. Dauer, Ashley P. Golden, Richard Wakeford, 2024-11-25. This book presents original research findings of The Million Person Study of Low-Dose Radiation Health Effects (MPS), the largest and most comprehensive epidemiologic study of its kind to investigate the health effects of low-level chronic radiation exposure on American workers and veterans throughout the 20th century. Since the early 1900s, epidemiologists have studied the consequences of radiation exposures, yet the health effects of low levels received gradually over time remain unresolved. This uncertainty comes at a time when the public and workers are experiencing ever-increasing levels of radiation exposure from advances in medical radiation imaging techniques, e.g., CT scans, frequent flying at high altitudes, and environmental and occupational exposures. The MPS is providing answers by studying 30 radiation-exposed U.S. populations, including workers at nuclear power plants, radiologists, workers at former Manhattan Project sites, nuclear submariners, nuclear weapons test participants, atomic veterans, industrial radiographers, and radium dial painters. Ongoing for more than 20 years and coordinated by the National Council on

Radiation Protection and Measurements Vanderbilt University Medical Center and Memorial Sloan Kettering Cancer Center the MPS is a national effort supported by the Department of Energy National Aeronautics and Space Administration U S Navy Defense Threat Reduction Agency Nuclear Regulatory Commission Centers for Disease Control and Prevention and the Environmental Protection Agency Unparalleled in scope and quality the MPS provides an understanding of low dose health effects that is desperately needed for decision makers and the radiation protection community as society continues to increase the uses of radiation technologies Individual chapters were originally published in the International Journal of Radiation Biology
