

BEFORE USING THE NEW MACHINE

1. Check for proper assembly and adjustment and make sure that all bolts are tightened securely. **RETIGHTEN AFTER A FEW HOURS OF OPERATION.**
2. Check the tires and inflate to the recommended pressure.
3. Attach the tongue control rope to a convenient point on the tractor.
4. Lubricate the machine completely and check the oil level of the gear box.
5. Operate the machine slowly for a period of time to run the chains in and determine that all parts work freely. Check the tension of both belts and tighten them as required.

OPERATION

ATTACHING TO THE TRACTOR

TRACTOR HITCH

The hitch of the HAYBINE is designed to be used with a standard tractor hitch. Be sure that the PTO is adjusted to meet the ASAE specifications as shown in the chart, Figure 1. Some measurements are different for 540 RPM and 1000 RPM tractors. An adaptor plate may have to be used on the drawbar to obtain the proper distance. An improperly located hitch may cause damage to the universal joints of the power take off. See Figure 1. If the tractor has 3-point hitch, raise the lower links as high as possible, to prevent damage to the PTO shaft.

TONGUE POSITIONS

The tongue has three operating positions and one transport position. Use the best operating position to maintain the straightest PTO drive line, Figure 2.

Secure the drawbar so that the hitch pin hole is directly below the power drive line.

1. Fasten the HAYBINE to the tractor drawbar with A HITCH PIN THAT CAN BE SECURELY FASTENED.
2. Remove the weight from the jack, swing it rearward until it locks in position. Lock the handle in the retainer clip.
3. Depress the spring loaded pin on the P.T.O. yoke and slide it on the tractor P.T.O. shaft. Be sure the pin falls in the groove of the P.T.O.

FIGURE 2

FIGURE 1

4. Adjust the PTO support on the tongue up or down so that the PTO shaft is as straight as possible.
5. Attach the tractor hydraulic cylinder as outlined in the "hydraulic cylinder" section. Raise the header, remove the hairpin and stop from the transport link. The stop may be carried conveniently on the carrier bracket as shown, Figure 3. A second hole is provided in the stop for an additional hairpin cotter. This additional cotter can be used to hold the shield in the raised position, Figure 3.
