Since the publication of Pim Levelt's book *Speaking: From Intention to Articulation* in 1989, a considerable number of studies have examined L2 speech production in the field of neuroscience with a particular focus on the link between speech perception and speech production. Undeniably, a neurolinguistic examination of speech production can enrich our understanding of how human brains compute linguistic information at a cognitive level. However, it is insufficient by only focusing on the neurocognitive dimension of speech production given that individuals' speech production can be subject to various individual differences.

factors either cognitively affectively or socio culturally It is therefore necessary to move beyond the neurocognitive understanding of speech production by taking every possible perspective into consideration Individual difference as an umbrella term covers psychological traits personal characteristics cognitive and emotional components that distinguish learners from each other Given that individual difference factors can reveal disparities in L2 learning and performance among learners such factors have attracted researchers growing interest concerning their influences on L2 speech processing their relationships with L2 speech performance and their contributions to L2 speech development Nevertheless our understanding of L2 speech production is not only insufficient compared to other L2 skills such as writing and reading but also limited to the neurocognitive account of L2 speech production More research therefore is in urgent need to uncover the influence of various individual differences factors on L2 speech production from multidisciplinary perspectives The Software Encyclopedia 2001 ,2001 *ITJEMAST 10(6) 2019* , International Transaction Journal of Engineering Management Applied Sciences Technologies publishes a wide spectrum of research and technical articles as well as reviews experiments experiences modelings simulations designs and innovations from engineering sciences life sciences and related disciplines as well as interdisciplinary cross disciplinary multidisciplinary subjects Original work is required Article submitted must not be under consideration of other publishers for publications *Design Solutions for Adaptive Hypermedia Listening Software* Turel, Vehbi,2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently Such a combination and delivery provides a multidimensional multi sensory digital environment in which rich efficient instant comprehensible optimum and meaningful input and feedback can be presented effectively and efficiently Moreover language learners attention can be drawn to forms and meanings in input Such aspects correspond with different theories and hypotheses of language learning and teaching This presents users learners with an environment that is easy to use tension free and optimal during self study However to be able to design and develop cost effective and professional adaptive hypermedia listening software there are certain scientific educational findings and implications that need to be implemented at every single stage To have access to such vital findings is not so easy and research must address this area Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language The chapters will cover learner strategy tools the effectiveness of this technology best practices in adaptive hypermedia listening software and the benefits and challenges of this technology for language learning It is ideal for companies institutions teachers policymakers academicians researchers advanced level students technology developers and decision making pertinent government officials interested in designing and developing multimedia listening environments for language learners **Correspondence Courses Offered by Colleges and Universities Through the United States Armed Forces Institute** ,1957
