New Essays On The Explanation Of Action:

New Essays on the Explanation of Action C. Sandis, 2008-11-28 These previously unpublished essays present the newest developments in the thought of philosophers working on action and its explanation focusing on a wide range of interlocking issues relating to agency deliberation motivation mental causation teleology interpretive explanation and the ontology of actions and their reasons **Philosophy of Action** Jonathan Dancy, Constantine Sandis, 2015-02-17 The **Philosophy of Action** An Anthology is an authoritative collection of key work by top scholars arranged thematically and accompanied by expert introductions written by the editors This unique collection brings together a selection of the most influential essays from the 1960s to the present day An invaluable collection that brings together a selection of the most important classic and contemporary articles in philosophy of action from the 1960 s to the present day No other broad ranging and detailed coverage of this kind currently exists in the field Each themed section opens with a synoptic introduction and includes a comprehensive further reading list to guide students Includes sections on action and agency willing and trying intention and intentional action acting for a reason the explanation of action and free agency and responsibility Written and organised in a style that allows it to be used as a primary teaching resource in its own right **A Companion to the Philosophy of Action** Timothy O'Connor, Constantine Sandis, 2012-08-02 A Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks **Historical Explanation** Gunnar Schumann, 2023-11-14 This book is concerned with the appropriate form of explanations in historiography and the social sciences It combines action theory and philosophy of historiography and develops a theory of teleological explanations of human actions based on late Wittgensteinian and Ordinary Language Philosophy insights In philosophy of action many philosophers favor causal theories of human action Additionally in current philosophy of historiography the majority view is that historians should explain historical phenomena by their causes This book pushes back against these mainstream views by reviving an anti causal view of explanation of current and past human actions The author argues that disciplines that deal with human actions require a certain form of explanation namely a teleological or intentional explanation This means that past human actions and their results will have to be explained by reasons of agents not by causes Therefore historiography employs a method of explanation which is in stark contrast to the sciences The author thus proposes a Verstehen understanding approach in

historiography and the social sciences Historical Explanation will be of interest to scholars and advanced students working in philosophy of action philosophy of history and philosophy of the social sciences **Handbook of European Policies**

Hubert Heinelt, Sybille Münch, 2018-01-26 This definitive Handbook addresses the current lack of research into European policymaking and development using an interpretive perspective Questioning areas that mainstream approaches tend to neglect contributors target the ways in which ideas arguments and discourses shape policies in the institutional context of the EU **Law and Language** Michael D. A. Freeman, Fiona Smith, 2013-02-21 Offers a broad overview of the interaction

between law and language and the way they influence each other Contains papers from the 15th annual interdisciplinary colloquium held in the Law School of UCL in July 2011 **Action, Knowledge, and Will** John Hyman, 2015 John Hyman explores central problems in philosophy of action and the theory of knowledge and connects these areas of enquiry in a new way His approach to the dimensions of human action culminates in an original analysis of the relation between knowledge and rational behaviour which provides the foundation for a new theory of knowledge itself **Negative Actions** Jonathan D. Payton, 2021-02-25 Negative actions intentional omissions refrainments etc seem to be genuine actions The standard metaphysical theories of action are event based they treat actions as events of a special kind But it seems that many and perhaps all negative actions are not events but absences thereof In this book I provide a comprehensive treatment of this problem and its solution I trace the appearance that negative actions are mere absences to the widely assumed view that negative action sentences sentences which describe an agent as omitting refraining etc are negative existentials reporting the non occurrence of an event of a certain kind I argue on the contrary that such sentences report the occurrence of an event not the absence of one Moreover I show how these events can be identified with ordinary positive events of the sort we should already have in our ontology In developing these views I provide a comprehensive picture of the metaphysics of negative actions the nature of our thought and talk about them and their place in a theory of action and agency

Praxiology and the Reasons for Action Piotr Makowski, 2017-07-05 This volume explores two traditions in practical philosophy action theory which concerns the nature of motivation for human action and praxiology the study of human action By bringing different perspectives together the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action The volume consists of three main parts The first part Reasons for Action bridges the gap between reasons for action theories and praxiology The second part of the volume titled Theories of Action explores philosophical approaches to action Finally in the third part Applications the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection assessment solving action incompleteness and knowledge management The ultimate goal of this volume is to broaden the scientific view of action to establish a perspective on action that is permeated by moral theories on the one hand and accounts focused on efficiency and economy of action on the other hand This work is the newest volume in Transaction s Praxiology series *Explanation in Action Theory and*

Historiography Gunnar Schumann, 2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography

From Action to Ethics Constantine Sandis, 2024-01-11 Over the course of the last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought In this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings accompanied by a new introduction Read collectively they demonstrate the breadth of his interests and ability to relate to broader issues within the culture connecting debates in philosophical psychology about motivation negligence and moral responsibility with Greek tragedy social psychology and literature Along this path from action to ethics Sandis engages with Hegel Wittgenstein Anscombe Ricoeur Davidson and Dretske together with contemporary authors such as Jennifer Hornsby and Jonathan Dancy As he responds to each thinker and theme he develops his own philosophical position the key thesis of which is that philosophy of action without ethics is empty ethics without philosophy of action is blind

A Metaphysics for Freedom Helen Steward, 2012-03-08 Helen Steward argues that determinism is incompatible with agency itself not only the special human variety of agency but also powers which can be accorded to animal agents She offers a distinctive non dualistic version of libertarianism rooted in a conception of what biological forms of organisation might make possible in the way of freedom

A Companion to Wittgenstein Hans-Johann Glock, John Hyman, 2017-01-30 A COMPANION TO WITTGENSTEIN The most comprehensive survey of Wittgenstein's thought yet compiled this volume of fifty newly commissioned essays by leading interpreters of his philosophy is a keynote addition to the Blackwell Companions to Philosophy series Full of penetrating insights into the life and work of the most important philosopher of the twentieth century the collection explores the full range of Wittgenstein's contribution to philosophy It includes essays on his intellectual development his work in logic and mathematics philosophy of language philosophy of mind and action epistemology ethics philosophy of religion and much else As well as examining Wittgenstein's contribution to human understanding in detail the Companion features vital contextual analysis that traces the relationship between his ideas and those of other philosophers and schools of thought including the Aristotelian and continental philosophical traditions Authors also address prominent themes that remain current in today's philosophical debates explaining Wittgenstein's continuing legacy alongside his historical significance

Essential reading for scholars of philosophy at all levels A Companion to Wittgenstein combines engaging commentary with unrivaled academic authority

Rational Causation Eric Marcus, 2012-03-20 Contemporary philosophers of mind tend to explain rationality by viewing the mind as a kind of machine the only alternative it has seemed to a ghostly supernatural explanation Marcus rejects this choice as false and defends a third way via rational causation which draws on the theoretical and practical inferential abilities of human beings

Understanding Mental Causation Andrea White, 2024-12-17 Understanding Mental Causation proposes a new non relational theory of mental causation Andrea White believes that contemporary philosophy of mind labours under a misapprehension of what mental causation is supposed to be This volume explains where the leading theories go astray and how the new theory proposed solves critical problems for philosophers of mind and action Ordinary experience suggests that what we do with our bodies causally depends somehow on what is going on in our minds However the problem of how to understand the causal relationship between mind and body remains

Contemporary philosophy of mind is shaped by the question how is it possible for the mental to causally interact with the physical Mental causation is often presented as a cause effect relation between mental and physical entities This understanding of mental causation is widely endorsed because it seems like a straightforward explanation of what is going on when people act intentionally Desires and beliefs are seen as causes of the actions they explain entailing the existence of causal relations between mental items and physical events White calls this the causalist view of intentional action This view is not universally accepted The non causalist view denies that intentional action entails the existence of causal relations between mental items and physical events However non causalists reach this conclusion by arguing that explanations of intentional actions which cite beliefs or desires are not usually causal explanations at all White presents a theory of intentional action that falls between the causalist and non causalist views She rejects the idea that as a cause is how we should understand the place of mentality in intentional action Concepts like belief desire and intention do not refer to items which can stand in causal relations to actions or physical events However like causalists she holds that explanations of intentional actions which cite the agent's thoughts do give causal information This intermediary view demands a new theory about the causation that is on display when human beings act intentionally one that does not reduce mental causation to a relation between mental items and physical events Orthodox theories of causation inspired by David Hume assume that causation is always a relation between events Therefore the causation demonstrated in intentional action must be a relation because all causation is and will count as mental causation if and only if at least one of the terms of that relation is a mental entity White challenges this orthodoxy by presenting her own non relational theory of causation Denying causation is always a relation she holds instead that causation is a general type of process in which substances engage and that exercising a causal power is to engage in a process White shows how this novel theory can be used to provide a better understanding of intentional action and the mental causation associated with it She suggests that to act intentionally is to engage in a process

and as such to exercise a power but a power of a special sort The power to act intentionally is a power to structure one's own activities so that they demonstrate a pattern a pattern which is only revealed by attributing mental states to the agent So when an agent acts intentionally they engage in the process of mental causation because the agent is manifesting a special power to organise their activities into a pattern that can be made sense of by appeal to mental concepts Broadening our understanding of causation and more specifically incorporating the concepts power and process opens up new ways of understanding intentional action and mental causation In *Understanding Mental Causation* White presents a compelling new account in this key area of philosophy of mind

Freedom and Enforcement in Action Janusz Czelakowski, 2015-06-10 Action theory is the object of growing attention in a variety of scientific disciplines and this is the first volume to offer a synthetic view of the range of approaches possible in the topic The volume focuses on the nexus of formal action theory with a startlingly diverse set of subjects which range from logic linguistics artificial intelligence and automata theory to jurisprudence deontology and economics It covers semantic mathematical and logical aspects of action showing how the problem of action breaks the boundaries of traditional branches of logic located in syntactics and semantics and now lies on the borderline between logical pragmatics and praxeology The chapters here focus on specialized tasks in formal action theory beginning with a thorough description and formalization of the language of action and moving through material on the differing models of action theory to focus on probabilistic models the relations of formal action theory to deontic logic and its key applications in algorithmic and programming theory The coverage thus fills a notable lacuna in the literary corpus and offers solid formal underpinning in cognitive science by approaching the problem of cognition as a composite action of mind

Action and Responsibility Andrew Sneddon, 2006-01-27 This book is an exploration of what it takes for an event to count as an action I first became interested in this topic nearly a decade ago while working on a different topic I kept coming across philosophers making claims about the nature of action that seemed false or at least dubious to me As a consequence I turned to the philosophy of action directly to get to the heart of the matter I have wrestled with this territory ever since I hope that with this book I have finally earned the intuitions that put me at odds with the philosophers I was originally reading This book develops ideas in Part Two of my doctoral dissertation which I wrote at Queen's University in Kingston Ontario Canada I loved being at Queen's for both professional and personal reasons My thanks go to the Social Sciences and Humanities Research Council of Canada for financial support as a doctoral candidate Steve Leighton and Ronald de Sousa were readers for my dissertation They provided some early and invaluable challenges to the ideas developed here My deepest debt of gratitude is owed to David Bakhurst my supervisor I learned a lot from David this book would not be the same without his help

Thinking About Reasons David Bakhurst, Margaret Olivia Little, Brad Hooker, 2013-08 Thinking about Reasons collects fourteen new essays on ethics and the philosophy of action inspired by the work of Jonathan Dancy one of his generation's most influential moral philosophers Many of the most prominent living thinkers in the area are

contributors to this collection which also contains an afterword by Dancy himself **Self-sufficiency of Law** Mariano Croce, 2012-06-02 The book investigates the role of law and legal experts in the organisational dynamics of a population demonstrating that law is a stable practice among those who in virtue of the special knowledge they master are called upon to select the normative facts of a population i.e. the interactional standards that are proclaimed as binding for the entire population by the publicly recognised legal experts whose peremptory judgments can be only revised by peers It proposes an integration of the recent research outcomes achieved in three different areas of study legal positivism legal institutionalism and legal pluralism and examines the notions of rule coercion institution practice elaborated by significant theorists in the mentioned areas and illumine both their merits and flaws Furthermore it advances a notion of law and a description of the legal field which are able to account for the nature of the legal field as the cradle of the social order new back cover copy In an era characterized by a streaking global pluralism the collapse of many state agencies the emergence of multiple sources of law and the rise of informal justice the idea of a unitary and homogenous legal system seems old fashioned But philosophers sociologists and anthropologists still hold many debates on the nature of law and its function which is that law represents an institution that characterizes any orderly social context of human beings and this book plunges into the center of those debates Self sufficiency of Law A Critical institutional Theory of Social Order investigates the role of law and legal experts in the organizational dynamics of a population It demonstrates that law is a stable practice among those who are called upon to select the normative facts of a population that is the interactional standards that are proclaimed as binding for the entire population by the publicly recognized legal experts To do this the author proposes an integration of the recent research outcomes achieved in three different areas of study legal positivism legal institutionalism and legal pluralism He examines the notions of rule coercion institution and practice elaborated on by significant theorists in these fields highlighting both the merits and flaws and ultimately advancing a notion of law and a description of the legal field which are able to account for the nature of the legal field as the cradle of social order This text covers key guidelines for empirical research and political activities in Western and non Western countries From Individual to Plural Agency Kirk Ludwig, 2016 Kirk Ludwig develops a novel reductive account of plural discourse about collective action and shared intention He argues that collective action is a matter of there being multiple agents of an event and requires no group agents while shared intentions are distributions of intentions across members of the group
