

## Tools needed for installation

- Pencil
- Drill
- Tape Measure
- Wire cutter
- Philips-head screwdriver
- Sandpaper
- Utility knife
- Safety eyewear
- Gloves

## Quick installation guide

- Where is the best place to install the speakers.
- Where do the speakers sound the best?
- Try to separate the speakers 6 - 10 feet apart.
- When placing the speakers in the ceiling, try to install them so that the fixed 15° angle woofer is pointed towards the main listening area. **(For LCR model only)**
- If you intend to paint the grilles, try to do so before installation.

### STEP 1: Cutout Tracing

Trace along the inclusive template. Cut along the traced line using a drywall saw or rotary drill. A simple, inexpensive drywall saw (about \$10 at your local hardware store) is the best choice for beginners. **Caution: This is the most important part of the entire installation.** If you are not certain whether any obstructions exist behind the desired mounting area, you should start by cutting a small hole in the center of your penciled mounting hole with a drywall saw. Use a piece of sandpaper to sand down the cut out edge for a smoother contour. **(See Diagram 1)**

### STEP 2: Connection

Run the cable into the cut out location while leaving an extra two feet to make the connection to the speaker easier. Strip back approximately 1/2 inch of the speaker cable insulation and twist the copper wires tightly for easy insertion.

On the back of the speaker, press down on the gold-plated compression terminal to reveal the "eye" and insert the speaker cable through the eye for secure connection. Release the compression terminal to lock each cable securely.

## Speaker wire

To determine the length and the gauge of speaker wire, you will need to measure the distance between your receiver/amplifier to the speakers.

- Always buy more than you think you would need.
- Equal wire lengths should always be used to maintain an equal balance in sound volume.
- Sound quality is lost when using thin wire gauge over a long distance.

18AWG minimum - for distances up to ..... 10 ft  
 16AWG - from ..... 10 to 50 ft  
 14AWG - from ..... 50 to 100ft

### STEP 3: Tweeter Adjustment

Your in-ceiling speakers come from the factory with the tweeter facing straight out from the baffle. This will result in the overall smoothest response. However, you can adjust the tweeter to focus the sound at your listening location. In order to do this, gently press on the grill (See Diagram 3). **Caution: Do not touch the tweeter dome while adjusting for your hearing preference. (See Diagram 2: Pivoting Tweeter Model Only.)**

### STEP 4: Mounting Dog Ear

Tighten the dog-ear brackets by simply turning the screws on the speaker's front baffle. Use a Phillips head screwdriver to turn the screws slowly clockwise. The quick-turn mounting system and frame will "sandwich" or clamp around the wall to hold the speaker securely in place. **(See Diagram 3)**
