Evolutionary Intelligence W. Russell Neuman, 2023-09-26 A surprising vision of how human intelligence will coevolve with digital technology and revolutionize how we think and behave It is natural for us to fear artificial intelligence But does Siri really want to kill us Perhaps we are falling into the trap of projecting human traits onto the machines we might build In *Evolutionary Intelligence* Neuman offers a surprisingly positive vision in which computational intelligence compensates for the well recognized limits of human judgment improves decision making and actually increases our agency In artful accessible and adventurous prose Neuman takes the reader on an exciting fast paced ride all the while making a convincing

case about a revolution in computationally augmented human intelligence Neuman argues that just as the wheel made us mobile and machines made us stronger the migration of artificial intelligence from room sized computers to laptops to our watches smart glasses and even smart contact lenses will transform day to day human decision making If intelligence is the capacity to match means with ends then augmented intelligence can offer the ability to adapt to changing environments as we face the ultimate challenge of long term survival Tapping into a global interest in technology s potential impacts on society economics and culture Evolutionary Intelligence demonstrates that our future depends on our ability to computationally compensate for the limitations of a human cognitive system that has only recently graduated from hunting and gathering
