Committee However it notes concerns about the effectiveness of these measures and highlights the risk that changes to funding mechanisms could undermine support for long term strategic marine science It is also recognised that the Natural Environment Research Council is currently operating with inadequate resources but it should consider the impact that restructuring its research funding has had on its support for strategic marine science The Committee recommended there should be a duty on commercial operations to share the data they collect It is concerning that funding for important long term monitoring programmes remains opportunistic and piecemeal Developments in technologies such as autonomous underwater vehicles could dramatically alter the way in which marine data is collected
