Theorizing in Social Science introduces the reader to the next generation of theory construction and suggests useful ways for creating social theory What makes certain types of theories creative and how does one go about theorizing in a creative way The

contributors to this landmark collection top social scientists in the fields of sociology economics and management draw on personal experiences and new findings to provide a range of answers to these questions Some turn to cognitive psychology and neuroscience s impact on our understanding of human thought others encourage greater dialogue between and across the arts and sciences while still others focus on the processes by which observation leads to conceptualization Taken together however the chapters collectively and actively encourage a shift in the place of theory in social science today

Words and Distinctions for the Common Good Gabriel Abend, 2023-07-25 In this book Gabriel Abend argues that social scientists need to focus more on the words and distinctions that their empirical claims depend on He suggests two central questions researchers need to consider First how should word w be used in the social science community Which is to say how should word w be defined should it be used at all and if so on what grounds Second should distinction d be accepted in the social science community For example when a social scientist proposes a distinction between childhood adolescence adulthood and old age should they be accepted and on what grounds Which distinctions and classifications are good for the social science community Throughout the chapters Abend carefully investigates these core issues and related questions arguing along the way that there is not a definitive answer Instead the book invites the social science community to work together to collectively address these consequential concerns

Asad, 2023-06-13 Because immigration is such a recurring and divisive topic in the United States it is easy to assume that we understand what it means for an immigrant to live under the specter of surveillance and punishment It is easy to assume as many scholars and journalists do that undocumented immigrants live on the run from the authorities constantly fleeing to the margins of daily life staying in the shadows beneath the eyes of the law And yet while it is certainly true that immigrants are constantly faced with mechanisms of surveillance that function as tools of societal exclusion this only tells part of the story As Asad L Asad shows many people with a sanctionable status cannot and

in some cases do not want to evade surveilling institutions or the formal records they generate evading the institutions that keep formal records is a luxury that most immigrants especially those with children cannot afford In Engage and Evade Asad uses a wealth of interviews and ethnographic observations collected in Dallas County Texas bolstered and contextualized by original analyses of national survey data to explore whether how and why immigrants engage with surveilling institutions Presenting the stories of immigrants living in mixed status families in which at least two members of the household have different legal statuses and focusing especially on the experiences of immigrant parents Asad argues that engagement with such institutions stems as much from hope for societal inclusion as it does from fear of exclusion By paying attention to the ways in which immigrants make sense of pursue and use the records that result from these engagements Asad reveals a variety of ways these individuals reinforce or resist their sanctionable status through the state s own surveillance **We're Still Here** Jennifer M. Silva,2019 Jennifer M Silva tells a deep multi generational story of pain and politics that will endure long after the Trump administration Drawing on over 100 interviews with black white and Latino working class residents of a declining coal town in Pennsylvania Silva reveals how the erosion of the American Dream is lived and felt Out of Place Lynette J. Chua,Mark Fathi Massoud,2024-02-22 Out of Place demonstrates how identity and positionality influence research design and methods in law and society *The Tumbleweed Society* Allison J. Pugh,2015 This book examines how we navigate questions of commitment and flexibility at work and at home in a world where insecurity has become the norm How do people today especially parents think and talk about what we owe each other on the job and in intimate relationships with partners children and others when so much is perpetually up in the air The Social Sciences in a Global Age Dipankar Sinha,2020-11-25 The book focuses on the status and role of the social sciences in the current millennium Drawing inspiration from a range of theorists it critically examines the key debates on the social science stream and focuses on its ir relevance in our times in the background of changing state market dialectics It specifically scrutinises knowledge politics of the global times to reveal how the neoliberal project aligns and fuses steep economic conditionalities with professional cultural parameters of higher academia to constrain autonomy and weaken radical expressions in social science pedagogy and research Asserting that the humanistic core of social sciences has the potential to resist acts of reducing knowledge to a monochromatic form the book argues that the social science stream can challenge and resist such hegemonic ambitions It also identifies and analyses the contradictions dilemmas predicaments and false steps of social scientists and avoids a reductive approach based on the west versus non west binary The volume will be of interest to scholars and researchers of the social sciences in general and of sociology politics of knowledge political theory political sociology and education in particular Becoming the News Ruth Palmer,2017-12-05 What does it feel like to be featured quoted or just named in a news story A refugee family the survivor of a shooting a primary voter in Iowa the views and experiences of ordinary people are an important component of journalism While much has been written about how journalists work and gather stories what

do we discover about the practice of journalism and attitudes about the media by focusing on the experiences of the subjects themselves In *Becoming the News* Ruth Palmer argues that understanding the motivations and experiences of those who have been featured in news stories voluntarily or not sheds new light on the practice of journalism and the importance many continue to place on the role of the mainstream media Based on dozens of interviews with news subjects *Becoming the News* studies how ordinary people make sense of their experience as media subjects Palmer charts the arc of the experience of making the news from the events that brought an ordinary person to journalists attention through the decision to cooperate with reporters interactions with journalists and reactions to the news coverage and its aftermath She explores what motivates someone to talk to the press whether they consider the potential risks the power dynamics between a journalist and their subject their expectations about the motivations of journalists and the influence of social media on their decisions and reception Pointing to the ways traditional news organizations both continue to hold on to and are losing their authority *Becoming the News* has important implications for how we think about the production and consumption of news at a time when Americans distrust the news media more than ever
