At the end of each country report, an annual overview of statistical and demographic data is presented in an appendix. By using a table format, up-to-date information is quickly accessible for each country. To see how these changes affect the articles, please read this sample chapter about Austria. The Yearbook of Muslims in Europe is an essential resource for analysis of Europe's dynamic Muslim populations. Featuring up-to-date research from forty-six European countries, the reports provide cumulative knowledge of on-going trends and developments around Muslims in different European countries. Regulating Genetically Modified Crops in View of Environmental Risks Ancui Liu,2022-05-25 This book analyzes international and Chinese regulatory approaches addressing environmental risks that may be caused by GM crops and examines how China implements its international obligations in its policies and laws Using the legal doctrinal method the book discusses the precautionary principle and the public involvement principle as well as several legal measures at the international law level and in Chinese law It observes that legal principles and measures as provided for in China s GMO legal framework have generally implemented the international obligations regarding the prevention of environmental risks that may be caused by the cultivation of GM crops and related activities However the book argues that Chinese law lacks an explicit codification of the precautionary principle and the same is true

with regard to public participation the regulatory framework lacks specific obligations It concludes that future research should focus on the application and enforcement of the relevant Chinese legislation and that it is also important to investigate how the environmental risks that may be caused by new techniques such as genome editing techniques could be prevented given the experience gained by regulating the cultivation of GM crops and related activities
