E. Harris's Dialectical Holism* James Schofield, 2021-10-12 The purpose of this work is to critically assess Errol E Harris's process philosophy in the face of contemporary research in the special sciences Harris devoted his life to grappling with the big questions concerning the relationships between nature mind and knowledge His 70 plus year career was distinguished his texts on the history of philosophy philosophy of science political philosophy philosophy of religion and consciousness were widely published and yet his metaphysics has until now remained excluded from mainstream discussions This book's contention is that Harris's work reveals as yet unnoticed connections between theories in numerous scientific disciplines ranging from psychology to cosmology and that an examination of certain theories within these disciplines may serve to strengthen his original arguments This work maintains that the resulting metaphysics frames a transdisciplinary paradigm shift and provides a viable solution to the hard problem of consciousness Ozone Hole S.A. Abbasi, Tasneem Abbasi, 2017-03-10 This book underscores the re emergence of the ozone hole problem and deals with it in its current context of exacerbating global warming It traces the history of the ozone hole from the stage of formation of the stratospheric ozone layer millions of years ago into the late 20th century when the anthropogenic destruction of that ozone was discovered The chapters are written to bring the reader up to the present day Factors that influence stratospheric ozone are discussed and the ways to halt ozone depletion are cataloged And more complex interrelationships are being discovered between ozone depletion and two other global concerns climate change and ocean acidification This book sheds light on the intricacy of the situation and its portants The book will be useful to students and researchers looking for a current overview of the ozone hole
