Delivering Health Care in America Leiyu Shi, Douglas A. Singh, 2015
Delivering Health Care in America Sixth Edition is the most current and comprehensive overview of the basic structures and operations of the U.S. health system from its historical origins and resources to its individual services, cost, and quality. Using a unique systems approach, the text brings together an extraordinary breadth of information into a highly accessible, easy-to-read resource that clarifies the complexities of health care organization and finance while presenting a solid overview of how the various components fit together. New ACA Takeaway section in each chapter as well as a new Topical Reference Guide to the ACA at the front of the book. Geographies of Meat Harvey Neo, Jody Emel, 2017-03-16 With the ever-rising demand for meat around the world, the production of meat has changed dramatically in the past few decades. What has brought about the increasing popularity and attendant normalization of factory farms across many parts of the world? What are some of the ways to resist such broad convergences in meat production, and how successful are they? This book locates the answers to these questions at the intersection between the culture, science, and political economy of meat production and consumption. It details how and why techniques of production have spread across the world, albeit in a spatially uneven way. It argues that the modern meat production and consumption sphere is the outcome of a complex matrix of cultural, politics, economics, and

technological faith Drawing from examples across the world including America Europe and Asia the tensions and repercussions of meat production and consumption are also analyzed From a geographical perspective food animals have been given considerably less attention compared to wild animals or pets This book framed conceptually by critical animal studies governmentality and commodification is a theoretically driven and empirically rich study that advances the study of food animals in geography as well as in the wider social sciences

shows that occupations that have been regulated for the shortest periods of time and that have minimal entry requirements such as interior designers are usually unable to achieve their economic goals of better compensation and less competition. For more heavily regulated occupations that have a longer history of regulation and have more rigorous entry requirements such as dentists, higher earnings and greater control over job related tasks are more likely. The book also presents new analysis on a long standing debate in law and economics i.e. whether litigation or regulation is better for society. Kleiner shows that the growth of occupational licensing suggests that some form of regulation may be gaining as the dominant type of public policy. Furthermore, Kleiner examines how regulations may influence the number of workplace injuries and deaths incurred by plumbers and electricians in the construction industry, the most hazardous industry as determined by the total number of workplace accidents in the United States. Overall, the analysis and evidence presented here demonstrate how labor markets work in the face of varying levels of government regulation. Therefore, this is a must read for anyone with an interest in the workings of the U.S. labor market or of labor markets in other more developed economies.
