Allen Cognitive Level Screen (ACLS) :
Date/ Time screened:

Screened by:

The Allen Cognitive Level Screen (ACLS) is a standardized assessment of current cognitive functioning. During illness, stress, or medication stabilization, cognitive performance may be affected and can interfere with an individual's daily functioning. The occupational therapy recommendations listed below are suggestions for the client and/or those providing assistance and are meant to facilitate the best ability to function within the least restrictive environment.

To live alone in the community, the following is recommended within a safe environment with well-established routines and reinforced safety plans:

- o Daily Supervision
- o Weekly Supervision

Transportation

- o Assistance is required to determine the most realistic, safe and functional transportation option(s) and to assure set up availability.
- o Alternative transportation options may include:

Medication

- Provide supervision for accurate medication management and monitoring of effects.
- Assistance for recognizing the ongoing need to take medications may be required; ongoing reminders and education are often helpful.
- o Additional recommendations: _____

Nutrition and Cooking

- Assistance to assure the following of any dietary restrictions is strongly recommended.
- Balanced meal planning, shopping and cooking require assistance. Use of appliances with automatic shut-off may be helpful.

Safety

- The client may underestimate or inconsistently anticipate potential hazards within their environment. Therefore, recommend frequent safety checks to the environment.
- Recommended set up of home environment for possible safety:
 - o Installation of tub bench or seat, grab bars and a hand held shower.
