Teaching and Learning History Online Stephen K. Stein,Maureen MacLeod,2023-04-17 Teaching and Learning History Online A Guide for College Instructors offers everything a new online history instructor needs in one package including how to structure courses integrate multimedia and manage and grade discussions as well as advice for department chairs on curriculum management student advising and more

In today's technological society online courses are quickly becoming the new normal in terms of collegiate instruction providing the ideal environment to flip the classroom and encourage students to hone critical thinking skills by engaging deeply with historical sources. While much of the attention in online teaching focuses on STEM business and education courses online history courses have also proven consistently popular. However due to the COVID 19 pandemic new history instructors are rushed into online teaching with little or no training or experience creating a need for a guide to ease the transition from classroom to online course development and teaching. A timely text this book aims to provide both new and experienced college history teachers the information they need to develop dynamic online courses.

Positive Educational Approaches to Teaching Effectiveness and Student Well-being Hans Henrik Knoop, Mirna Nel, Sufen Chen, Rebecca Shankland, Llewellyn Ellardus Van Zyl, Matthew Cole, 2022-11-08

Governing Families Rosalind Edwards, Pamela Ugwu-dike, 2023-02-15 This book provides a focused discussion of how families are governed through technologies. It shows how states attempt to influence shape and govern families as both the source of and solution to a range of social problems including crime. The book critically reviews family governance in contemporary neo liberal society notably through technologies of self-responsibilisation, biologisation and artificial intelligence. The book draws attention to the poor working class and racialised families that often are marked out and evaluated as culpable, dysfunctional and a threat to economic and social order, obscuring the structural inequalities that underpin family lives and discriminations that are built into the tools that identify and govern families. Filling a gap where disciplinary perspectives cross-cut, this book brings together sociological and criminological perspectives to provide a unique cross-disciplinary approach to the topic. It will be of interest to researchers, scholars and lecturers studying sociology and criminology as well as policy makers and professionals working in the fields of early years and family intervention programmes including in social work, health education and the criminologically relevant professions such as police and probation.

A Beginner's Guide to Teaching Mathematics in the Undergraduate Classroom Suzanne Kelton, 2020-11-29 This practical engaging book explores the fundamentals of pedagogy and the unique challenges of teaching undergraduate mathematics not commonly addressed in most education literature. Professor and mathematician Suzanne Kelton offers a straightforward framework for new faculty and graduate students to establish their individual preferences for course policy and content exposition while alerting them to potential pitfalls. The book discusses the running of day-to-day class meetings and offers specific strategies to improve learning and retention as well as concrete examples and effective tools for class discussion that draw from a variety of commonly taught undergraduate mathematics courses. Kelton also offers readers a structured approach to evaluating and honing their own teaching skills as well as utilizing peer and student evaluations. Offering an engaging and clearly written approach designed specifically for mathematicians, *A Beginner's Guide to Teaching Mathematics in the Undergraduate Classroom* offers an artful introduction to teaching undergraduate mathematics in universities and community colleges.
