**Evolution Education Around the Globe** Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

*International Handbook on Education in Southeast Asia* Lorraine Pe Symaco, Martin Hayden, 2021-12-23 This International Handbook provides a detailed account of the education systems of 11 Southeast Asian nations including Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. It presents a systematic sector-by-sector explanation of how these national education systems deliver educational services and respond to national and international issues and challenges. With 56 chapters, the International Handbook is the region's most comprehensive educational reference source. In the first of its chapters, the editors introduce the regional context and draw attention to the distinctive characteristics of each of the 11 systems. Southeast Asia, representing 8.5% of the world's population, is as dynamic as it is diverse. The International Handbook charts progress and establishes a benchmark for documenting future developments. It also provides a stepping-off point for more detailed investigations of decision-making processes and outcomes across the 11 national education systems.

*The Budget of the United States Government* United States. Office of Management and Budget, **The Influence of Theorists and Pioneers on Early Childhood Education** Roy Evans, Olivia N. Saracho, 2022-02-23 The chapters in this book reflect on the major shifts in the views of early childhood thinkers and educators who have contributed to contemporary theoretical frameworks pertaining to early childhood learning. The book also revisits and critically analyses the influence of developmental theories on early childhood education starting in the 1890s with the work of G. Stanley Hall that established the close association of early childhood education and child development. Several chapters comprise critical examinations of the fundamental influence of thinkers such as Piaget, Vygotsky, Kohlberg, Adler, Pestalozzi, Froebel, and so on on early childhood learning. The book also contends that these theoretical conceptions of child development have heavily influenced modern views of early childhood education.
