Urban Tourism in the Global South Christian M. Rogerson, Jayne M. Rogerson, 2021-07-13 This book examines and addresses the particular character of urban tourism occurring in the global South. It presents research essays on tourism in urban areas of South Africa, a country which is associated with big 5 nature tourism but where urban areas are also major tourism destinations. The book contextualizes urban tourism in South Africa as part of the other half of urban tourism, an overlooked but energetic scholarship which is emerging on urban places in the global South. The volume moves to present a collection of original material variously on national perspectives on urban tourism following by a cluster of city level perspectives. The last three contributions turn to the role of tourism in small towns, the bottom rung in the urban settlement system. Issues of concern include gastronomic tourism, VFR travel, airports, landscapes, climate change, Airbnb and creative tourism. Finally, as COVID 19 is potentially a defining historical moment for urban tourism, the volume incorporates historical research perspectives in order to address the overwhelming present mindedness of mainstream urban tourism writings. The book highlights the challenges and opportunities for tourism development in the environment of the urban global South and is relevant to scholars of both tourism and urban studies as well as researchers in development studies.

Education for sustainable development in BRICS Ewelina K. Niemczyk, 2023-03-01 In the past ten years, the concept of education for sustainable development has become one of UNESCO's key educational initiatives to address current global challenges. However, the attention was mainly devoted to primary and secondary education and higher education was somewhat neglected. The primary focus on basic education has also diverted academic attention from the research exploring the relationship between higher education and sustainable development. Only recently has the academic discourse on this topic begun to gain ground. On that note, this book is meant to place higher education at the core of the necessary transformations to create awareness of more sustainable practices and policies.

Students Must Rise Ann Heffernan, Noor Nieftagodien, Sifiso Mxolisi Ndlovu, Bhekizizwe Peterson, 2016-06-01 A detailed account of the incredibly influential Soweto Student Uprising of 1976. The Soweto Student Uprising of 1976 was a decisive moment in the struggle against apartheid. It marked the expansion of political activism to a new generation of young activists but beyond that, it inscribed the role that young people of subsequent generations could play in their country's future. Since that momentous time, students have held a special place in the collective imaginary of South African history. Drawing on research and writing by leading scholars and prominent activists, *Students Must Rise* takes Soweto 76 as its pivot point but looks at student and youth activism in South Africa more broadly by considering what happened before and beyond the Soweto moment. Early chapters assess the impact of the anti-pass campaigns of the 1950s, of political ideologies like black consciousness as well as of religion and culture in fostering political consciousness and organisation among youth and students in townships and rural areas. Later chapters explore the wide-reaching impact of June 16th itself for student organisation over the next two decades across the country.

Two final chapters consider contemporary student based political movements including RhodesMustFall and FeesMustFall and historically root these in the long and rich tradition of student activism in South Africa 2016 marks the 40th anniversary of the 1976 June 16th uprisings This book rethinks the conventional narrative of youth and student activism in South Africa by placing that most famous of moments the 1976 students uprising in Soweto in a deeper historical and geographic context

Corrupted Jonathan D Jansen,2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
