Pink Brain Blue Brain How Small Differences Grow Into:

Pink Brain, Blue Brain Lise Eliot, 2010-05-01 Groundbreaking research opens a new chapter in the Nature vs Nurture debate The 2010 smash hit arrives in mass market paperback Turning conventional thinking about gender differences on its head Lise Eliot issues a call to close the troubling gaps between boys and girls and help all children reach their fullest potential Drawing on years of exhaustive research and her own work in the field of neuroplasticity Eliot argues that infant brains are so malleable that small differences at birth become amplified over time as parents teachers and the culture at large unwittingly reinforce gender stereotypes Indicating points of intervention where social pressures can be minimised she offers concrete solutions for helping everyone grow into wellrounded individuals **Build the Brain for Reading, Grades 4-12** Pamela Nevills, 2010-10-18 Every teacher knows that no two students are exactly alike This guidebook infuses the most current neurology research into concrete steps for teaching reading in a targeted developmentally appropriate way Author Pamela Nevills clearly describes the brain s structures and functions devoting an entire chapter to the adolescent brain Rich with innovative tips tools and examples for guiding both new and experienced readers Build the Brain for Reading Grades 4 12 helps teachers **Encyclopedia of Diversity in Education** James A. Banks, 2012-05-17 The diversity education literature both nationally and internationally is broad and diffuse Consequently there needs to be a systematic and logical way to organize and present the state of research for students and professionals American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live work and lead With continually evolving information on diversity policies practices and programs it is important to have one place where students scholars teachers and policymakers can examine and explore research policy and practice issues and find answers to important questions about how diversity in U S education enriched with theories research and practices in other nations are explained and communicated and how they affect institutional change at both the K 12 and postsecondary levels With about 700 signed entries with cross references and recommended readings the Encyclopedia of Diversity in Education 4 volumes in both print and electronic formats will present research and statistics case studies and best practices policies and programs at pre and postsecondary levels Diversity is a worldwide phenomenon and while most of the entries in the Encyclopedia will focus on the United States diversity issues and developments in nations around the world including the United States are intricately connected Consequently to illuminate the many aspects of diversity this volume will contain entries from different nations in the world in order to illuminate the myriad aspects of diversity From A to Z this Encyclopedia will cover the full spectrum of diversity issues including race class gender religion language exceptionality and the global dimensions of diversity as they relate to education This four volume reference work will be the definitive reference for diversity issues in education in the United States and the world **Cracking the Digital Ceiling** Carol Frieze, Jeria L. Quesenberry, 2019-10-24 A global examination of what influences women s participation in computing and what can be done

to fix the gender gap Ideological Fixation Azar Gat, 2022 After theorists around 1960 proclaimed the death of ideology ideological divides and clashes have reemerged with renewed intensity throughout the world including in the liberal democracies In the United States they have become particularly venomous The other side is widely viewed as malicious irrational or downright stupid and often as barely legitimate The zeal of the opposing sides is often scarcely less than that which characterized the religious ideologies of old Indeed historical religious ideologies have largely been replaced by secular religions or religion substitutes The book is not another survey of past and present ideologies It is an attempt to understand the cognitive emotional and social roots of ideology and ideological fixation It combines insights from evolutionary psychology regarding the nature of some of our deepest proclivities with a broad sweep through history

Deep Secrets Niobe Way, 2013-05-06 Boys are emotionally illiterate and don t want intimate friendships In this

empirically grounded challenge to our stereotypes about boys and men Niobe Way reveals the intense intimacy among teenage boys especially during early and middle adolescence Boys not only share their deepest secrets and feelings with their closest male friends they claim that without them they would go wacko Yet as boys become men they become distrustful lose these friendships and feel isolated and alone Drawing from hundreds of interviews conducted throughout adolescence with black Latino white and Asian American boys Deep Secrets reveals the ways in which we have been telling ourselves a false story about boys friendships and human nature Boys descriptions of their male friendships sound more like something out of Love Story than Lord of the Flies Yet in late adolescence boys feel they have to man up by becoming stoic and independent Vulnerable emotions and intimate friendships are for girls and gay men No homo becomes their mantra These findings are alarming given what we know about links between friendships and health and even longevity Rather than a boy crisis Way argues that boys are experiencing a crisis of connection because they live in a culture where human needs and capacities are given a sex female and a sexuality gay and thus discouraged for those who are neither Way argues that the solution lies with exposing the inaccuracies of our gender stereotypes and fostering these critical relationships and fundamental human skills *The Scientific American Book of Love, Sex and the Brain* Judith Horstman, Scientific

American, 2011-11-15 Who do we love Who loves us And why Is love really a mystery or can neuroscience offer some answers to these age old questions In her third enthralling book about the brain Judith Horstman takes us on a lively tour of our most important sex and love organ and the whole smorgasbord of our many kinds of love from the bonding of parent and child to the passion of erotic love the affectionate love of companionship the role of animals in our lives and the love of God Drawing on the latest neuroscience she explores why and how we are born to love how we are hardwired to crave the companionship of others and how very badly things can go without love Among the findings parental love makes our brain bigger sex and orgasm make it healthier social isolation makes it miserable and although the craving for romantic love can be described as an addiction friendship may actually be the most important loving relationship of your life Based on recent studies and articles culled from the prestigious Scientific American and Scientific American Mind magazines The Scientific American Book of Love Sex and the Brain offers a fascinating look at how the brain controls our loving relationships most intimate moments and our deep and basic need for connection **Race, Monogamy, and Other Lies They Told You** Agustín
