

The globe of the Moon has a radius of 10 inches. Find the volume of the globe. Round your answer to the nearest hundredths and use

3.14 for pi

$$V = \frac{4}{3} \pi r^3$$

① find r

$$r = 10$$

② Use the formula

$$V = \frac{4}{3} \pi r^3$$

$$V = \frac{4}{3} (3.14) (10)^3$$

$$V = 4186.67 \text{ in}^3$$

Technical Mathematics Paul A. Calter, Michael A. Calter, 2011-03-22 This textbook has been in constant use since 1980 and this edition represents the first major revision of this text since the second edition. It was time to select make hard choices of material polish refine and fill in where needed. Much has been rewritten to be even cleaner and clearer. New features have been introduced and some peripheral topics have been removed. The authors continue to provide real world technical applications that promote intuitive reader learning. Numerous fully worked examples and boxed and numbered formulas give students the essential practice they need to learn mathematics. Computer projects are given when appropriate including BASIC spreadsheets computer algebra systems and computer assisted drafting. The graphing calculator has been fully integrated and calculator screens are given to introduce computations. Everything the technical student may need is included with the emphasis always on clarity and practical applications. **AP® Calculus AB & BC Crash Course Book + Online** Joan Rosebush, 2016-10-06 REA's Crash Course for the AP Calculus AB BC Exams Gets You a Higher Advanced Placement Score in Less Time 2nd Edition Updated for the 2017 Exams Crash Course is perfect for the time crunched student the last minute studier or anyone who wants a refresher on the subject. Are you crunched for time? Have you started studying for your Advanced Placement Calculus AB BC exams yet? How will you memorize everything you need to know before the tests? Do you wish there was a fast and easy way to study for the exams AND boost your score? If this sounds like you don't panic. REA's Crash Course for AP Calculus AB BC is just what you need. Our Crash Course gives you Targeted Focused Review Study Only What You Need to Know. The Crash Course is based on an in depth analysis of the AP Calculus AB BC course description outline and actual AP test questions. It covers only the information tested on the exams so you can make the most of your valuable study time. Written by an experienced AP Calculus instructor the targeted review chapters prepare students for the test by only focusing on the topics tested on the AP Calculus AB BC exams. Our easy to read format gives students a crash course in AP Calculus AB BC and covers functions graphs units derivatives integrals and polynomial approximations and series. Expert Test taking Strategies. Our author shares detailed question level strategies and explain the best way to answer AP questions you'll find on the exams. By following this expert tips and advice you can boost your overall point score. Take REA's Practice Exams. After studying the material in the Crash Course go to the online REA Study Center and test what you've learned. Our free practice exams one online for both Calculus AB and Calculus BC features timed testing detailed explanations of answers and automatic scoring analysis. Each exam is balanced to include every topic and type of question found on the actual AP exam so you know you're studying the smart way. Whether you're cramming for the test at the last minute looking for extra review or want to study on your own in preparation for the exams this is the study guide every AP Calculus AB BC student must have. When it's crucial crunch time and your Advanced Placement exam is just around the corner you need REA's Crash Course for AP Calculus AB BC. **Fundamentals of Probability: A First Course** Anirban

DasGupta,2010-04-02 Probability theory is one branch of mathematics that is simultaneously deep and immediately applicable in diverse areas of human endeavor It is as fundamental as calculus Calculus explains the external world and probability theory helps predict a lot of it In addition problems in probability theory have an innate appeal and the answers are often structured and strikingly beautiful A solid background in probability theory and probability models will become increasingly more useful in the twenty first century as difficult new problems emerge that will require more sophisticated models and analysis This is a text on the fundamentals of the theory of probability at an undergraduate or first year graduate level for students in science engineering and economics The only mathematical background required is knowledge of univariate and multivariate calculus and basic linear algebra The book covers all of the standard topics in basic probability such as combinatorial probability discrete and continuous distributions moment generating functions fundamental probability inequalities the central limit theorem and joint and conditional distributions of discrete and continuous random variables But it also has some unique features and a forward looking feel

Problems on Mapping Class Groups and Related Topics

Benson Farb,2006-09-12 The appearance of mapping class groups in mathematics is ubiquitous The book presents 23 papers containing problems about mapping class groups the moduli space of Riemann surfaces Teichmüller geometry and related areas Each paper focusses completely on open problems and directions The problems range in scope from specific computations to broad programs The goal is to have a rich source of problems which have been formulated explicitly and accessibly The book is divided into four parts Part I contains problems on the combinatorial and cohomological group theoretic aspects of mapping class groups and the way in which these relate to problems in geometry and topology Part II concentrates on connections with classification problems in 3 manifold theory the theory of symplectic 4 manifolds and algebraic geometry A wide variety of problems from understanding billiard trajectories to the classification of Kleinian groups can be reduced to differential and synthetic geometry problems about moduli space Such problems and connections are discussed in Part III Mapping class groups are related both concretely and philosophically to a number of other groups such as braid groups lattices in semisimple Lie groups and automorphism groups of free groups Part IV concentrates on problems surrounding these relationships This book should be of interest to anyone studying geometry topology algebraic geometry or infinite groups It is meant to provide inspiration for everyone from graduate students to senior researchers
