

Read the passage to answer question 6-10 [ntsresults.or](https://www.ntsresults.or)

Culture refers to a group's program for survival in and adaptation to its environment. The cultural program consists of knowledge, concepts, and values that are shared by group members through their symbols and systems of communication.

The United States, like other nations, has a shared set of values and symbols that form the core culture. This culture is shared to some extent all the various cultural and ethnic groups that make up the nation. This culture is difficult to describe because the United States is such a complex nation; it is easier to identify the core culture within an isolated premodern society. However, it is possible to assert that the political institutions reflecting some of the nation's core values were heavily influenced not only by the British but also by the Native Americans, particularly those practices related to making group decisions.

A key concept in the U. S. core culture is the idea that "all men are created equal." When the nation's founding fathers expressed this idea in 1776, their conception of men was limited. White men without property, white women, and all African Americans and Native Americans were excluded. While the concept of equality had a limited meaning at that time, it has proven to be a powerful idea in the quest for civil rights in the United States. It remains an important part of the U. S. core culture and is still used by victimized groups to justify their struggles for equality.

6. With which of the following statements would the author most probably agree?

- A. People generally view culture in terms of survival.
- B. Americans believe their culture is superior to others.
- C. The cultural program of a society is established by its political institutions.
- D. Most people in a country share certain core values.

7. Which of the following would NOT be included under the definition of "culture" in paragraph 1?

- A. Educational system
- B. Concept of humor
- C. Skin and eye color
- D. Concept of human rights

8. In the underlined lines, in paragraph 2, the author suggests that:

- A. the United States is an isolated premodern society
- B. the culture of a premodern society is simpler than the U. S. culture
- C. the United States has no core culture
- D. very little is known about societies that have developed in isolation
