**Make: Volume 83** Dale Dougherty,2022-11 It's been another tumultuous year in the world of embedded electronics. Supply chain snags have scarcely relented while new chips jostle for position as the go-to for makers. In this issue of Make we look at how scarcity is affecting the industry and impacting new and stalwart boards alike. We explore how RISC-V chip architecture is putting open silicon in the hands of makers. And if your favorite board is out of stock, we offer smart substitutes. Also included is our annual Make Guide to Boards comparing 79 of the hottest microcontrollers, single-board computers, and FPGAs with an emphasis on those you can actually get your hands on. Plus 25 projects to make, including Use full-color LED strings and a Pixelblaze controller to make cuddly animated pillows. Stitch a stylish and sturdy roll-up tool carrier for on-the-go fixes and builds. Convert your 3D printer to 5-axis and print the impossible. Take control of smart home gadgets with Z-Wave and Raspberry Pi. Make a fun paper airplane that blows bubbles as it soars. And much more. **The**

**Point of It** John McGreal,2015-02-28 The Point of It is part of a series of three Artists Books that represent three stages of an artistic journey in the years 1995-2006 exploring the dialectic of mark, word, and image. A recurrent theme in each is that of surprise. The Point of It describes a further surprise in 1999 involving a shift into the art of punctuation. Prints like [www](#) where to begin, [com](#) explore the aesthetic possibilities of the standard marks of punctuation in the space of writing. The emergent concept of The Punctage has facilitated a typology of forms, also opening up the affinity of punctuation with musical notation and hence the musicality of textuality. The three books show how working through these stages in visual art was a condition for the spatial writing and reading of both sound and silence in my *it to you* 2013, *The Book of It* 2010, as well as *In The Face of It* 2013.
