

## Recall test answers - out of 15 marks

1. What is a gamete?  
A cell with half the number of chromosomes of the parent cell. (3)
1. Name the male and female gametes in a) a human b) a daisy plant  
a) Male = sperm Female = egg (1)  
b) Male = pollen Female = egg (1)
3. For each row, tick one box to show which method of cell division is correct. (3)

	Mitosis	Meiosis
Growth, mending, replacing	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Gamete production occurs	<input checked="" type="checkbox"/>	<input type="checkbox"/>
New cells show variation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
New cells have same no. of chromosomes as parent	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Happens in all cells	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Two divisions occur	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Four new cells are formed as a result	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Identical cells are formed	<input type="checkbox"/>	<input checked="" type="checkbox"/>

# Recall Tests On Powerpoint With Answers

**Bennett L. Schwartz**

## **Recall Tests On Powerpoint With Answers:**

**Programming and Problem Solving with C++** Nell Dale, Chip Weems, 2010-10-22 Programming Languages

**Programming and Problem Solving with C++** Nell B. Dale, Chip Weems, 2014 The best selling Programming and Problem Solving with C now in its Sixth Edition remains the clearest introduction to C object oriented programming and software development available. Renowned author team Nell Dale and Chip Weems are careful to include all topics and guidelines put forth by the ACM IEEE to make this text ideal for the one or two term CS1 course. Their philosophy centers on making the difficult concepts of computer science programming accessible to all students while maintaining the breadth of detail and topics covered. Key Features: The coverage of advanced object oriented design and data structures has been moved to later in the text. Provides the highly successful concise and student friendly writing style that is a trademark for the Dale Weems textbook series in computer science. Introduces C language constructs in parallel with the appropriate theory so students see and understand its practical application. Strong pedagogical elements a hallmark feature of Dale Weems' successful hands on teaching approach include: Software Maintenance case studies, Problem Solving case studies, Testing, Debugging exercises, Exam Preparation exercises, Programming Warm up exercises, Programming Problems, Demonstration Projects, and Quick Check exercises. A complete package of student and instructor resources include a student companion website containing all the source code for the programs and exercises in the text, additional appendices with C reference material and further discussion of topics from the text, and a complete digital lab manual in C. Instructors are provided all the solutions to the exercises in the text, the source code, a Test Bank, and PowerPoint Lecture Outlines organized by chapter.

**Programming and Problem Solving with C++ : Brief Ed** Nell Dale, 2010      *Programming and Problem Solving with Java* Nell B. Dale, Chip Weems, 2008 Extensively revised the new Second Edition of Programming and Problem Solving with Java continues to be the most student friendly text available. The authors carefully broke the text into smaller more manageable pieces by reorganizing chapters allowing student to focus more sharply on the important information at hand. Using Dale and Weems' highly effective progressive objects approach, students begin with very simple yet useful class design in parallel with the introduction of Java's basic data types, arithmetic operations, control structures, and file I/O. Students see first hand how the library of objects steadily grows larger, enabling ever more sophisticated applications to be developed through reuse. Later chapters focus on inheritance and polymorphism using the firm foundation that has been established by steadily developing numerous classes in the early part of the text. A new chapter on Data Structures and Collections has been added, making the text ideal for a one or two semester course. With its numerous new case studies, end of chapter material, and clear descriptive examples, the Second Edition is an exceptional text for discovering Java as a first programming language.      [How to Study for Standardized Tests](#) Donald J. Sefcik, Gillian Bice, Frank Prerost, 2013 How to Study for Standardized Tests Focuses on Three Key Variables: the Test You and Important Study Resources Including Study Methods

and Techniques This Detailed Guide Describes and Explains How to Take Tests Effectively and Efficiently In A Timed Environment While Helping to Reduce the Impact of Test Anxiety the Authors Include A Discussion of Techniques to Help You Select Answers When Guessing Is Your Only Option by Learning As Much As You Can About What It Takes to Prepare for and Perform Well on Standardized Tests and by Following the Advice In This Book You Can Realize Your High
