GAO History, 1921-1991 Roger R. Trask, 1991 **Encyclopedia of Library and Information Science** Allen Kent, 1983-06-07 Cross-Currents Jean L. Manore, 2006-01-01 Most activities in our lives involve electricity Yet how often do we recall that even the simple act of turning on a light is supported by a long history of debates over group vs individual rights environmental impact political agendas and technological innovations Using the image of cross currents as the organizing metaphor this book details the many and often turbulent interactions and interconnections that occurred among the various people and events during the building of the northeastern Ontario hydroelectric system Special focus is on Native and non Native interests southern business and political elites northern natural resources and the interactions between technology and the environment Manore concentrates on the co operation that existed among the various interest groups during periods of expansion and amalgamation In today s environment of limited energy resources respect for the rights of First Nations and ecological concerns this book is a reminder that co operation rather than conquest is a more realistic approach to development *The Medical Department of the United States Army in the World War: Field operations*, by Charles Lynch. Surgeon-General's Office, 1925 A History of the Global Wheat Trade Marco Bertilorenzi, Carlo Fumian, Giovanni Gozzini, 2025-04-29 During the second half of the 19th century a new global market for wheat came to the fore Ever since scarce and perishable food has been transformed into a modern global commodity millions of tons of which is sold bought and transported across the oceans providing the daily bread for a fast growing world population This book explores the historical origin of the global wheat market offering an actor centred view of the history of this new global commodity The contributions to this volume demonstrate that the development of the global wheat trade through the late 19th and early 20th centuries has not only impacted the world food regime it also led to the dissemination of new economic institutions Countless technological innovations such as elevators or telegraphic lines have paved the way to the creation of new financial tools for trade such as futures and grain exchanges which transformed the market The book also examines new global actors such as Cargill Louis Dreyfus or Bunge y Born who took advantage of the new opportunities provided by the interlinked and globalized world grain trade For the first time in history the price of a single commodity which was crucial for human life ended up being decided in the areas of production by the producers and started to be fixed further afield in specific and anonymous trading places The

book will be of great interest to historians of economics business trade agriculture globalization and commodities The Medical Department of the U.S. Army in the World War United States.
