Mission of the Church Jerome Boone, Jerald Daffe, William Effler, Henry Smith, 2018-05-30

What is the mission of the corporate church? What is the mission of local churches regardless of denominations? What is the reason for the existence of the local church? These three questions not only deserve consideration by leadership but also need to be understood by the entire membership to enable productive kingdom work. It is so easy for a congregation to develop programs and activities based on what other groups are doing or on what are the perceived needs of the moment. These do have value; however, they tend to be based on our human concepts rather than the directives of Scripture.

Terry Cross, Dean of the School of Religion at Lee University, describes this book as follows: Another book on the church. This one is different. Thirteen seasoned professors with some 400 years of combined ministerial experience engage various aspects of the mission of the church. Much like the pulse that beats from a strong heart.

the idea of partnering with God's mission as transformed participants in God's work reappears throughout the chapters. While the focus of attention is different for each author, the theme beats the same pulse throughout: the mission of God is the heart of God and must be the heart of the church. With additional contributions from Bob Bayles, Terry Cross, Rolando Cuellar, Tom Doolittle, Jimmy Harper, John Lombard, Lisa Long, Edley Moodley, Mark Walker, **Motor Trend**, 1973 *Religion, Religious Organisations and Development*. Carole Rakodi, 2016-04-04. This collection adds to a burgeoning literature concerned with the roles played by religions in development. The authors do not assume that religion and religious organisations can be used to achieve development objectives or that religiously inspired development work is more holistic, transformative and authentic. Instead, they subject such assumptions to critical and as far as possible objective scrutiny, focusing on how adherents of several religious traditions and a variety of organisations affiliated with different religions perceive the idea of development and attempt to contribute to its objectives. Geographically, chapters in the volume encompass Africa, South Asia and the Asia Pacific. Four of the papers have an international focus, providing a preliminary framework for analysing the role of religion in development, considering the roles played by faith-inspired organisations in two regions: the Asia Pacific and Sub-Saharan Africa, and analysing transnational Muslim NGOs. The individual case studies focus on nine countries: India, Kenya, Pakistan, Nigeria, Tanzania, Sudan, Malawi, Sri Lanka, South Africa. Consider four religions: Islam, Hinduism, Christianity, Buddhism, and can be grouped under four themes: they consider religion, wellbeing and inequality; the roles of religious NGOs in development; whether and how religious organisations influence, respond to or resist social change; and whether religious service providers reach the poor. Finally, practice notes show how three religious development organisations try to put their principles into practice. This book was published as a special double issue of *Development in Practice*. [Innovation in Agriculture with IoT and AI](#). Suchismita Satapathy, Debesh Mishra, Arturo Realvázquez Vargas, 2022-01-01. This book examines different innovations in worldwide agricultural systems, including the applications of artificial intelligence, AI, Internet of Things, IoT, and features of machine learning, ML, for the benefits of the farm community. Specifically, it examines the use of agricultural equipment and IoT to reduce physical stress; innovative equipment that measures and reduces mental workload; and innovative techniques to help with employee safety. Featuring case studies and future implications, this book is an excellent guide for academics and researchers in the agri sector. **Fighting Cockpits**. Donald Nijboer, 2023-08-17. What was it like to sit in the pilot's seat and take control of a P-51 Mustang in World War II? What about an F-14 Tomcat at the height of the Cold War? Or a Lockheed Martin F-22 Raptor today? The cockpits of these fighter and bomber aircraft are revealed in *Fighting Cockpits*. Showcasing more than 50 of the world's most famous combat cockpits from early World War I aircraft to present-day fighters, this book includes more than 200 rich color photos from photographer Dan Patterson, as well as detailed history about combat cockpit development from aviation expert and historian Donald Nijboer.
