The History of Rhetoric and the Rhetoric of History Nancy S. Struever,2023-05-31 In the articles collected here Nancy Struever explores the basic assumption that rhetoric is not simply a bag of persuasive tricks but functions necessarily as a mode of inquiry investigating not simply the mechanics of production and reception of discourse but the psychological factors of reason and passion engaged by the assertion modification and contest of beliefs and dispositions of the civil communities The first section looks both at contemporary historians employing rhetorical constructs and tactics and at contemporary accounts of the employment of rhetorical pedagogical material and theoretical texts in medieval and Renaissance cultural practices The second set of articles considers change and continuity in the rhetorical exploitation s of genre forms in cultural programs focuses on the strong reorientation of Classical forms of moral inquiry on the ingenious use of the proverb of etymology of the exemplum as well as on the changes in strategies in the theater the novel and art criticism The final section deals with

the strong historical interconnections of rhetoric with other disciplines the motives and investigative tactics of medicine and rhetoric in the Renaissance and Early Modernity and the shared interests and interwoven careers of rhetoric and law

The Gargantuan Polity Michael Randall,2008-11-18 Critics and scholars have long argued that the Renaissance was the period that gave rise to the modern individual The Gargantuan Polity examines political legal theological and literary texts in the late Middle Ages to show how individuals were defined by contracts of mutual obligation which allowed rulers to hold power due to approval of their subjects Noting how the relationship between rulers and individuals changed with the rise of absolute monarchy Michael Randall provides significant insight into Renaissance culture and politics by showing how individuals went from being understood in terms of their objective relations with the community to subjective beings By studying this evolution he challenges the argument that subjectivity enabled modern political autonomy to come into existence and instead argues that subjectivity might have disempowered the outwardly directed and highly political individuals of the late Middle Ages A profound and detailed study of one of the most drastic periods of change The Gargantuan Polity will be of interest to scholars of French literature the Renaissance and intellectual history The Mirror of Confusion Andrew M. Kirk,2015-12-22 How did English dramatists portray the neighboring domain of France and its history in their plays The study examines a selection of Shakespearean and other history plays the French tragedies of George Chapman Christopher Marlowe s revealing historical tragedy The Massacre at Paris and several literary and nonliterary historical texts The result is a unique and timely contribution to our understanding of how cultural differences influenced the historical perspectives of English dramatists as well as how Renaissance plays shaped and were shaped by their historical material Drawing on the insights of cultural studies historiography and ethnography this study re examines the historical representation of a neglected yet influential part of early modern Europe and the paradoxical relationship between English writers and their French subject matter Although information about France and French history was becoming increasingly available in England at the end of the sixteenth century for English writers France remained a distant land its history and people misunderstood and misrepresented
