A Manual for Tilapia Business Management Ram C. Bhujel, 2014-06-18 Tilapias are an increasingly important farmed fish for human consumption. Hailed as an important source of protein for growing populations, production is set to double within the next ten years and expand beyond traditional areas of production in Africa and Asia. With a practical focus, this book is aimed at tilapia farmers and producers, describing best practice production methods, egg management, new technologies, nutrition, business practices, marketing, equipment, maintenance, accounting, and logistics. Tilapia Farming Gulam Hussain, 2025-06-20 *Tilapia Farming: Breeding, Plans, Mass Seed Production, and Aquaculture Technologies* provides the latest information on global tilapia farming, hatchery stock breeding, novel aquaculture technologies, feed and fish health management, and food safety and supply chain considerations. Immensely popular for its high nutritional value and low cost of production, tilapia has recently been recognized as the second most farmed fish worldwide. Given the increase in global tilapia production from 369 000 metric tons at the turn of the 21st century to 6 million metric tons in 2020, this book serves as a critically important guide for hatchery operators and aquaculture entrepreneurs. Written by a leading expert on aquaculture research and development, this book introduces readers to the global tilapia aquaculture industry and delivers key information on general and reproductive biology of tilapia. Early chapters explore brood stock management and the development and operation of mixed sex and monosex commercial tilapia seed production systems, semi-intensive culture systems, and intensive culture systems. Central chapters explore novel tilapia farming technologies, feed and feeding, major diseases, and tilapia health management. Final chapters discuss practical concepts in food safety, processing, and trade, and future prospects of the industry. *Tilapia Farming: Breeding, Plans, Mass Seed Production, and Aquaculture Technologies* addresses novel information on the latest biological, technological, and supply chain considerations for tilapia aquaculture. It is an indispensable guide for applied scientists and aquaculturists worldwide. Reviews the global status of tilapia farming. Covers emerging aquaculture technologies.
