R. Gershon Henoch Leiner's Thought in Its Contexts* Jonathan Garb,2024-03-04 Does God Doubt shows that Rabbi Gershon Henoch Leiner of Radzin considered God to be revealed as doubt Thus according to this profound and important nineteenth century Hasidic leader doubt is an essential aspect of the human condition and especially of religious life His position is shown to be remarkably bold and unique compared to kabbalistic writing and especially to the Hasidic worlds to which he belonged At the same time the roots of his thought are located in earlier discussions of doubt as one of the highest parts of the divine world Doubt about in and of God is part of the Hasidic contribution to modernity A Brief Review of Ancient and Modern Philosophy, in its connection with scepticism and religion. Containing also a correspondence betwixt the author and the late George Combe ... Together with criticisms on modern theologians, and refutations of Hamilton, Ferrier, Hennell, Combe, Renan, etc Robert DEUCHAR,1864 *An [Un]Likely Alliance* Bernd Herzogenrath,2009-05-05 This volume presents an original and in depth study devoted to the discussion and relevance of the notion of the environment and ecology within the frame work and ontology of the philosophy of Gilles Deleuze and Felix Guattari Their non dualist and materialist re thinking of these issues is analyzed from various positions within Cultural Studies and the Sciences Thinking Environment s with Deleuze Guattari is thus far removed from what might be termed intellectual tree hugging it is a call to think complexity and to complex thinking a way to think the environment and environments as negotiations of human and nonhuman dynamics Such a thinking by default carefully evades Cartesian dualisms such as nature versus culture biology versus technology or natural versus artificial At a time when the distinctions as well as the transitions between nature and culture are getting more and more fluid Deleuze Guattari s alliance with environmental thinking turns out to be a rather fruitful exciting and likely one one that allows for a single mode of articulating environmental evolutionary and technological registers and

relations and for the conceptualization of a general non anthropocentric ecoscience This book thus aims at a radical re thinking of these concepts from a Deleuzian Guattarian i e non dualist and materialist perspective *The Seven Sigma Mindset* Andreas G. Cohen,2015-09-01 Why the dollar will remain the world s most powerful currency Monetary rivalry is a fact of life in the world economy Intense competition between international currencies like the US dollar Europe s euro and the Chinese yuan is profoundly political going to the heart of the global balance of power But what exactly is the relationship between currency and power and what does it portend for the geopolitical standing of the United States Europe and China Popular opinion holds that the days of the dollar long the world s dominant currency are numbered By contrast *Currency Power* argues that the current monetary rivalry still greatly favors America s greenback Benjamin Cohen shows why neither the euro nor the yuan will supplant the dollar at the top of the global currency hierarchy Cohen presents an innovative analysis of currency power and emphasizes the importance of separating out the various roles that international money might have After systematically exploring the links between currency internationalization and state power Cohen turns to the state of play among today s top currencies The greenback he contends is the indispensable currency the one that the world can t do without Only the dollar is backed by all the economic and political resources that make a currency powerful Meanwhile the euro is severely handicapped by structural defects in the design of its governance mechanisms and the yuan suffers from various practical limitations in both finance and politics Contrary to today s growing opinion *Currency Power* demonstrates that the dollar will continue to be the leading global currency for some time to come *Echoes from the Chamber* Richard Gabriel,2012-06-18 Share the Life Odyssey of the Author charting 50 years of Profound Supernormal experiences in preparation for a special task in Egypt Now following a decade of below the radar exploration beneath the Giza Plateau and in the Great Pyramid accompanied by his twinflame Judith there has been a spectacular discovery Our ancient Ancestors left

Up From The Basement Stewart S. Lampe, 2002 Up From The Basement is an intense personal story about the author who rides an emotional roller coaster as he struggles with his need for psychological recovery and change Written in a first person narrative style this non fiction work reads like a novel The reader is swept into the world and mind of the author as he immerses himself into a maze of self inquiry He unravels the layers of self imposed protection that developed into barriers to the awareness of his inner strength Motivated by his desire to understand himself and responsibility to eventually help others this psychological tale challenges the reader to pause for self reflection while it chronicles the author s ongoing pains and struggles This insightful flow of internal processing incorporates awareness at the physical intellectual emotional and spiritual levels The power of this work lies in the compelling stream of consciousness style that appears chaotic while mirroring the frantic thought processing of the author The ongoing temptation will arise for the reader to compare and contrast his or her own personal traits and internal introspection The story is interspersed with practical applications of the basic principles of A Course In Miracles while dealing with personal issues such as fear depression and forgiveness

Realist Thought and the Nation-State Konstantinos Kostagiannis, 2017-09-21 This book recovers the history of realist theorization on nationalism and the nation state Presented in a sequence of snapshots and illustrated by examples drawn from the foreign policy of great powers this history is represented by four key realist thinkers It uses the centrality of power in realism as a starting point to claim contrary to conventional wisdom about realism that for realists the state is better understood not as a political unit outside history but rather as a manifestation of power unfixed in time It also claims that the process of gradual impoverishment of the concept of power from classical to structural realism had profound implications for realism as what the latter gained in parsimony it lost

in analytical purchase As a result elaborate understandings of nationalism and its relation to the state are replaced by one dimensional approaches In order to offer meaningful engagement with foreign policy neorealists often have to resort to the recovery of some of the complexity of classical realist accounts
