Part I covers the fundamentals of structure and motion; Part II covers the skeletal system, including skeletal and fascial tissues; Part III contains a detailed study of the joints of the body; and finally, Part IV examines how muscles function. Written by noted lecturer and educator Joseph Muscolino, this text includes access to an Evolve website with 150 video clips demonstrating major joint actions of the body, as well as muscle palpation. Complete atlas of bones, bony landmarks, and joints includes hundreds of full-color illustrations providing comprehensive coverage of bones not found in other kinesiology books. Clear, straightforward explanations of kinesiology concepts cover muscle contraction, coordination of muscles with movement, core stabilization, posture, exercise, reflexes, and how the nervous system controls and directs the muscular system. Coverage of strengthening exercises and stretching emphasizes the purposes and benefits of stretching and how to perform various stretching techniques.
