The Europeanization of National Foreign Policies towards Latin America Lorena Ruano, 2013-05-07

Who shapes the European Union's policy towards Latin America How has this EU policy modified individual member states relations with the region This book provides a comparative account of seven member states bilateral links with Latin America since 1945 in the context of their EU membership and based on the concept of Europeanization It illustrates how and why the main architects of this EU policy have been Spain and Germany In contrast Poland Sweden and Ireland which had little previous interaction with Latin America have developed their current relations with that region virtually as a result of their EU membership The United Kingdom and France lie in the middle they have been influential in certain policy areas and key periods in history while they have adapted to what is done at the EU level in others Practitioners established academic experts as well emerging scholars in the field bring to bear a novel combination of pioneering research and cutting edge conceptual analysis on this important but neglected area of the EU's foreign relations

Media Ownership and Concentration in America Eli M. Noam, 2009-10-19

The concentration of private power over media has been the subject of intense public debate around the world Critics have long feared waves of mergers creating a handful of large media firms that would hold sway over public opinion and endanger democracy and innovation But others believe with equal fervor that the Internet and deregulation have opened the media landscape significantly How concentrated has the American information sector really become What are the facts about American media ownership In this contentious environment Eli Noam provides a comprehensive and balanced survey of media concentration with a methodical scientific approach He assembles a wealth of data from the last 25 years about mass media such as radio television film music and print publishing as well as the Internet telecommunications and media related information technology After examining 100 separate media and network industries in detail Noam provides a powerful summary and analysis of concentration trends across industries and major media sectors He also looks at local media power vertical concentration and the changing nature of media ownership through financial institutions and private equity The results reveal a reality much more complex than the one painted by advocates on either side of the debate They show a dynamic system that fluctuates around long term concentration trends driven by changing economics and technology
