Evolutionary Interpretations of World Politics William R. Thompson,2016-05-06 The field of international relations is often stagnated in realism and liberalism Groundbreaking and guaranteed to stir debate this work will move the field of international relations beyond its current and often inadequate assumptions The contributors describe how states ideologies and other areas of analysis evolve conquer others or disappear entirely Change and the fluid nature of history though so clearly a part of historical reality are not so deeply embedded in other paradigms as they are in the variation and selection model of evolutionary international relations Some contributors lay out the various controversies inherent to the new theory while others apply the paradigm to specific problems in IR theory Regardless of the approach the presentation of this entirely new perspective and method succeeds in forming a new paradigm of international relations Contributors include William R Thompson George Modelski Vincent S E Falger David P Rapkin Jennifer Sterling Folker Hendrik Spruyt Stewart Patrick Paul Hensel Karen Rasler Craig N Murphy Jeffrey A Hart Sangbae and Brian Pollins      *The Capacity to Govern* Yehezkel Dror,2012-12-06 The inadequacies of contemporary forms of governance are increasingly recognized the brain drain from politics distrust of governments the danger of mass media and money dominated elections and the failure of governments to find good policy options on major issues Industry civil society and non governmental organizations however important cannot compensate for government s incapacity to shape the future which only it is democratically entitled to do Radical improvements in governance are urgently needed but salient proposals are scarce This book diagnoses contemporary governments as obsolete and proposes changes in values structures staffing public understanding and political culture to equip governance for the radically novel challenges of the 21st century This is the first Report dealing with governance commissioned and approved by the Club of Rome testifying to the significance of this book      **The Fourth Wave** Herman Maynard,Susan E. Mehrtens,1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler s revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change *The Fourth Wave* examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless

boundaries between work and private lives for all employees

**Biology and Political Science** Robert Blank, Samuel M. Hines Jr., 2002-03-11 This book demonstrates the increasing interest of some social scientists in the theories research and findings of life sciences in building a more interdisciplinary approach to the study of politics It discusses the development of biopolitics as an academic perspective within political science reviews the growing literature in the field and presents a coherent view of biopolitics as a framework for structuring inquiry across the current subfields of political science

**The Dance with Community** Robert Booth Fowler, 1991-07-25 Contemporary intellectuals have rushed to embrace the concept of community What does this tell us about American political thought Why are intellectuals uneasy with modern liberal individualism and its institutional policy results Why is political intellectual discourse dominated today by complaint In *The Dance with Community* Robert Booth Fowler reflects upon these and related questions My goal he writes is to present contemporary political thought about community for what it is a conversation interactive spirited and sometimes tough There have been many interpretations of the much discussed decline in community spirit Rather than offer another Fowler steps back to look at the debate itself He examines from the perspective of an intellectual historian the attention to community in current American political thought and explores the setting of that attention He also identifies five alternative models of community integral to the current debates and sketches a clear image of each its relationship to others the logic of its appeal and its emphases and problems In each instance he places the model into the larger conversation over alternative communities and the value of community itself

New Perspectives on Anarchism Nathan J. Jun, Shane Wahl, 2010-01-01 The study of anarchism as a philosophical political and social movement has burgeoned both in the academy and in the global activist community in recent years Taking advantage of this boom in anarchist scholarship Nathan J Jun and Shane Wahl have compiled twenty six cutting edge essays on this timely topic in *New Perspectives on Anarchism*

By the Grace of Guile Loyal D. Rue, 1994 Only a noble lie can save us from the psychological and social chaos now threatened by the spread of skepticism about the meaning of life and the universe

*Building Sustainable Societies: A Blueprint for a Post-industrial World* Dennis Clark Pirages, 2016-09-16 A collection of articles addressing the issue of whether the industrial model of human progress can be sustained in the long term It asks what the social political economic and environmental implications as well as potential solutions to the problem of resource intensive growth are

Toward a Bioregional State Mark D. Whitaker, 2005 Environmental sociologist Mark D Whitaker is a comparative historical researcher on the politics of environmental degradation and sustainability *Toward A Bioregional State* is his novel approach to development and to sustainability He proposes that instead of sustainability being an issue of population scale managerial economics or technocratic planning an overhaul of formal democratic institutions is required This is because environmental degradation has more to do with the biased interactions of formal institutions and informal corruption Because of corruption we have environmental degradation Current formal democratic institutions of states are forms of informal gatekeeping and as such intentionally maintain

democracy as ecologically out of sync He argues that we are unable to reach sustainability without a host of additional ecological checks and balances These ecological checks and balances would demote corrupt uses of formal institutions by removing capacities for gatekeeping against democratic feedback Sustainability is a politics that is already here only waiting to be formally organized

Human Migration to Space Elizabeth Song Lockard, 2014-05-13 Human migration to space will be the most profound catalyst for evolution in the history of humankind yet this has had little impact on determining our strategies for this next phase of exploration Habitation in space will require extensive technological interfaces between humans and their alien surroundings and how they are deployed will critically inform the processes of adaptation As humans begin to spend longer durations in space eventually establishing permanent outposts on other planets the scope of technological design considerations must expand beyond the meager requirements for survival to include issues not only of comfort and well being but also of engagement and negotiation with the new planetary environment that will be crucial to our longevity beyond Earth Approaching this question from an interdisciplinary approach this dissertation explores how the impact of interior space architecture can meet both the physical and psychological needs of future space colonists and set the stage for humankind to thrive and grow while setting down new roots beyond Earth

**Governmentality** Ulrich Bröckling, Susanne Krasmann, Thomas Lemke, 2010-09-13 Examining questions of statehood biopolitics sovereignty neoliberal reason and the economy Governmentality explores the advantages and limitations of adopting Michel Foucault's concept of governmentality as an analytical framework Contributors from a wide range of disciplinary backgrounds highlight the differences as well as possible convergences with alternative theoretical frameworks

*Selected Writings of Maureen O'Hara on the Art, Science, and Hope of Humanism* Keith Tudor, Maureen O'Hara, 2025-06-30 This book presents the work of the eminent British American psychologist Maureen O'Hara It explores the trajectory of humanistic psychology over the last few decades providing a link between its original proponents notably Carl Rogers and its contemporary manifestations The text reproduces 18 of O'Hara's original papers arranged in six parts each of which reflects a significant area in which she has contributed her rigorous analysis and creative thinking i.e. the person-centred approach humanistic psychology third force science client-centred therapy psychology futures and education A unique feature of the book is a series of dialogues about O'Hara's contributions in each of these areas with the book's editor Keith Tudor The dialogues reveal not only O'Hara's reflections on and further thinking about each area of her contributions but also how prescient her analysis was and how contemporary and relevant her thinking still is Bringing together a collection of O'Hara's works to a broader audience this book will be of interest to humanistic psychologists and psychotherapists as well as those studying and/or training in this field

*Biopolitics* Thomas Lemke, 2011-02-07 The first systematic overview of the notion of biopolitics and its relevance in contemporary theoretical debate The biological features of human beings are now measured observed and understood in ways never before thought possible defining norms establishing standards and determining average values of human life

While the notion of biopolitics has been linked to everything from rational decision making and the democratic organization of social life to eugenics and racism Thomas Lemke offers the very first systematic overview of the history of the notion of biopolitics exploring its relevance in contemporary theoretical debates and providing a much needed primer on the topic Lemke explains that life has become an independent objective and measurable factor as well as a collective reality that can be separated from concrete living beings and the singularity of individual experience He shows how our understanding of the processes of life the organizing of populations and the need to govern individuals and collectives lead to practices of correction exclusion normalization and disciplining In this lucidly written book Lemke outlines the stakes and the debates surrounding biopolitics providing a systematic overview of the history of the notion and making clear its relevance for sociological and contemporary theoretical debates

Morel Tales Gary Alan FINE, Gary Alan Fine, 2009-06-30 In this thoughtful book Gary Fine explores how Americans attempt to give meaning to the natural world that surrounds them Although nature has often been treated as an unproblematic reality Fine suggests that the meanings we assign to the natural environment are culturally grounded In other words there is no nature separate from culture He calls this process of cultural construction and interpretation naturework Of course there is no denying the biological reality of trees mountains earthquakes and hurricanes but he argues they must be interpreted to be made meaningful Fine supports this claim by examining the fascinating world of mushrooming Based on three years of field research with mushroomers at local and national forays Morel Tales highlights the extensive range of meanings that mushrooms have for mushroomers Fine details how mushroomers talk about their finds turning their experiences into fish stories the one that got away war stories and treasure tales how mushroomers routinely joke about dying from or killing others with misidentified mushrooms and how this dark humor contributes to the sense of community among collectors He also describes the sometimes friendly sometimes tense relations between amateur mushroom collectors and professional mycologists Fine extends his argument to show that the elaboration of cultural meanings found among mushroom collectors is equally applicable to birders butterfly collectors rock hounds and other naturalists

Nature's Web Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and

sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them

**The Future Internet** Jenifer Winter,Ryota Ono,2015-12-14 Readers seeking to gain a handle on the internet's global expansion will find this book rich in scholarly foundations combined with cutting edge discussion of emerging ICTs and services and the complex societal contexts in which they are embedded To explore possibilities to the fullest extent a sociotechnical systems approach is employed focusing on the interplay of technical social cultural political and economic dynamics to explore alternative futures ones that are not part of the dominant discourse about the internet These shared perspectives are not well addressed elsewhere in current discussions Awareness of these dynamics and the fluidity of the future is important as humankind moves forward into the uncertain future Due to the sociotechnical complexity of the Internet policymakers businesspeople and academics worldwide have struggled to keep abreast of developments This volume's approach is intended to stimulate dialogue between academics and practitioners on a topic that will affect most aspects of human life in the near term future

*Transhumanism - Engineering the Human Condition* Roberto Manzocco,2019-03-11 This book is designed to offer a comprehensive high level introduction to transhumanism an international political and cultural movement that aims to produce a paradigm shift in our ethical and political understanding of human evolution Transhumanist thinkers want the human species to take the course of evolution into its own hands using advanced technologies currently under development such as robotics artificial intelligence biotechnology cognitive neurosciences and nanotechnology to overcome our present physical and mental limitations improve our intelligence beyond the current maximum achievable level acquire skills that are currently the preserve of other species abolish involuntary aging and death and ultimately achieve a post human level of existence The book covers transhumanism from a historical philosophical and scientific viewpoint tracing its cultural roots discussing the main philosophical epistemological and ethical issues and reviewing the state of the art in scientific research on the topics of most interest to transhumanists The writing style is clear and accessible for the general reader but the book will also appeal to graduate and undergraduate students
