India E Annamalai,2001-06-04 The eighth in the series of books on language and development this book brings out the
political and linguistic dimensions of multilingualism in India Professor Annamalai addresses three main issues what
maintains multilingual speech communities and how this maintenance is promoted what is progress in such communities and
whom does it exclude the impact of multilingualism on the purity norms of languages The author establishes that acquisition
of multilingualism takes place through two processes First through formal schooling restricted to the elite and second
through primary and secondary socialization at home and at the work place which is where majority learning takes place He
explains power relations in multilingualism by pointing out that for social purposes code switching between languages
constantly takes place for economic social and political gains though this does not necessarily imply that the less dominant
language merges with the more dominant one In fact the opposite takes place for political gains Professor Annamalai points
out that the hierarchical relation between languages arises due to failure in planning where the key actors in policy making
use the provisions in the constitution for political gain thus promoting preservation of a separate identity rather than
language growth The book finally explores the Code Use Groups studying the grammatical neighbourhood of languages and
looks at the hexical insertion language factor and linguistic determinants of code mixing **Oxford University Calendar**
