Secondary School Students Attitudes Towards Greener Journals:

Community Secondary Schools in Tanzania Elia Shabani Mligo, Devotha Lawrence Mshana, 2018-01-22 Community Secondary Schools are the majority secondary schools in Tanzania These are schools built by community initiatives with the aim of helping more children acquire a secondary education Despite this good intention these schools face a number of challenges One such challenge has to do with academic performance This book investigates this challenge It examines the factors that contribute to students poor performance in the community secondary schools in Tanzania to discern the main factors contributing to their poor performance Many factors contribute to students poor performance such as lack of support from parents on educational issues teachers and students attitudes and perceptions on education inadequate learning and teaching materials and resources learning and teaching environments as well as lack of adequate motivation for teachers and students This book explores these challenges and proposes future prospects to make such schools have efficient performance in Tanzania and other places of the world they are found

Green Frontiers ,2008-01-01 Environmental education has reached an interesting crossroads There has never before been such media attention on hard to grasp issues such as climate change nor has there ever been such scientific understanding and agreement about the varied aspects of the environmental crisis the loss of biodiversity and the health effects of human made toxins and pollutants In addition there has never been so much high quality research within environmental education with new journals flourishing in Canada Australia and South Africa to give just a few examples Yet despite all this knowledge and attention there has not been a significant shift in the way the economy operates the way governments govern or the way people live Consumption of resources continues to increase and these patterns continue to be closely correlated with levels of waste pollution environmental ill health and social injustice This book showcases the work and thinking of environmental educators who are concerned about the residual mechanism within their field the guiding symbol of the web of life in all its dynamism notwithstanding The notion of web recognizes interaction between all elements in a system but falls short of recognizing the flow of the whole through the system and its parts The notion of dance is used here to convey this fundamental yet oft overlooked dimension to wholeness
