Q.1 Read the following passage carefully and answer the questions given at the end.

All spiders are carnivorous. Spiders eat insects including other spiders. Scientist often divide Spiders into two groups- Web spiders produce webs to capture prey while ground spiders hunt prey directly without using a web. Almost all spiders use poison glands to kill or paralyze their prey or to defend themselves.

Contrary to popular belief most spider bites are not dangerous to humans; of the 40,000 species of Spiders only about 30 species produce bites that may cause illness. Spiders rarely attack humans they feel threatened and if they do bite, the wound is rarely serious. There is absolutely no reason to kill any spider or to call an exterminator if you have spiders in your house, as an old English saying goes, if you want to live and thrive let a spider run alive.
