Key Concepts

- How do geneticists use the principles of probability?
- How do geneticists use Punnett squares?

Genetics and Probability (page 267)

1. The likelihood that a particular event will occur is called Probability.
2. Circle the letter of the probability that a single coin flip will come up heads.
a. 100 percent b. 75 percent c. 50 percent d. 25 percent
3. Is the following sentence true or false? The past outcomes of coin flips greatly affect the outcomes of future coin flips. False
4. Why can the principles of probability be used to predict the outcomes of genetic crosses? because they are random like coin tosses

Punnett Squares (page 268)

5. How do geneticists use Punnett squares? Punnett squares can be used to predict and compare genetic variations that will result from a cross
6. Complete the Punnett square to show the possible gene combinations for the F₂ offspring.

processes this text enables students to become proficient in all three of these essential topics For students in science and engineering who may take only one course in probability theory mastering all three areas will better prepare them to collect analyze and characterize data in their chosen fields
