Molecular Approaches to Soil, Rhizosphere and Plant Microorganism Analysis John Eric Cooper, J. R. Rao, 2006 Plants have evolved both general and highly specialized defence mechanisms that function to prevent diseases caused by the majority of microbial pathogens they encounter Highly specialized defence is governed by specific interactions between pathogen avr avirulence genes loci and alleles of the corresponding plant disease resistance R loci These defences can be very dynamic as microbes from the same species can act differently in their co evolution with the specific host plant which in turn has similarly evolved its response to external threats There have been major developments in the field of plant microbe interactions in recent years due to newly developed
