Technical Documentation And User Documentation:

Translating Technical Documentation Without Losing Quality Marc Achteleg, 2012 Translating technical documentation such as user manuals online help and other types of user assistance is essentially different from translating other forms of documents If you translate technical documentation in the same way as you translate other texts chances are that your clients mostly technical writers will be quite unhappy with the results For example complex language that makes a novel or sales brochure interesting can be exactly what makes a user manual incomprehensible When translating technical documentation you should understand how your clients have designed their documents for clearness and simplicity Only then can your translation reflect the same principles This book provides you with a compilation of the basic technical writing rules that every technical writer follows When you adhere to the same rules as you translate it s almost guaranteed that both writers and readers will be happy with the quality of your work Audience Professional translators *User's Guide to Technical Library Services* United States. Technical Documentation Best Practices - Planning and Structuring Helpful User Assistance Marc Achteig, 2020-10-25 Even the best information is worthless if users can't find it Providing user friendly structure and navigation is just as important as providing well written content However structuring user assistance isn't as simple and obvious as it may seem If you think that your document structure should follow the structure of your product's components and functions You're wrong If you think that the type of document that you prefer is the same type of document that your clients prefer You're wrong If you think that all the information that you have is important You're also wrong This book tells you how to structure index and link your documents so that readers actually find the information they need Topics covered General structuring principles that all structural decisions have in common Choosing media Should you provide a printed or printable user manual PDF online help or both What information should go into the user manual and what information should go into online help Which help format should you use Can context sensitive help calls be implemented Should you provide interactive features Planning documents Should you put all information into one document or should you supply several user manuals for specific purposes and user groups How should you name your documents Planning document sections What are the major sections that your documents should consist of Are there any standard sections that you mustn't forget Planning topics What types of information do your clients need How should you build and name the individual topics within the document Planning the order of sections and topics How should you organize the sections and topics within your documents What comes first What comes later Planning navigation Which navigational devices should you provide in printed documents and in online help systems Where should you provide links or cross references and where not
