such as trauma and radiology. Still other books in the series focus on interdisciplinary issues such as the computer based patient record, electronic health records and networked healthcare systems. Renamed Health Informatics in 1998 to reflect the rapid evolution in the discipline now known as health informatics, the series will continue to add titles that contribute to the evolution of the field. In the series, eminent experts serving as editors or authors offer their accounts of innovations in health informatics. Increasingly, these accounts go beyond hardware and software to address the role of information in influencing the transformation of healthcare delivery systems around the world. The series also increasingly focuses on peopleware and the organizational, behavioral and societal changes that accompany the diffusion of information technology in health services environments.

Hematologic Abnormalities and Acute Lung Syndromes Janet S. Lee, Michael P. Donahoe, 2016-10-17 This book provides a unique framework for examining acute lung syndromes that arise from hematologic disorders or is defined by a hematologic abnormality as a key feature. Acute lung processes arising from hematologic disorders can present as life threatening conditions and as such the pulmonary physician or critical care physician are often directly involved in care or called upon to provide expertise. Chapters are organized into three sections each with an emphasis on pathogenesis and current understanding of mechanisms. The text begins with the central theme of the lungs as the direct interface between the external environment and blood, description of individual components of the hematopoietic system, their function and relevance to the lungs. The second section outlines both benign and malignant primary hematologic disorders that can lead to acute pulmonary manifestations. The final section focuses on acute lung syndromes stemming from complications of transfusion and treatment. Chapters are presented in an easy to access format providing information on diagnosis, management and outcomes. This is a valuable resource for pulmonary fellows in training, pulmonologists, critical care physicians and physicians involved in caring for patients in the ICU.
