### **The Historical Roots of Technical Communication in the Chinese Tradition** Daniel Dingxiong Ding, 2020-09-23

This book traces Chinese technical communication from its beginnings investigating how it began and the major factors that shaped its practice. It also looks at the major philosophical and historical traditions in Chinese technical communication and how historical and philosophical threads play out in contemporary Chinese technical communication practice. In considering such issues, the book gives attention to some of the major classical Chinese texts but treats them as artefacts of technical communication. It explores the roots of Chinese technical communication, reviews traditional philosophy that has shaped such practice, discusses the key links in the history of Chinese technical communication, and recounts historical roots and contemporary practice side by side. It provides the reader with compelling perspectives on the historical roots of Chinese technical communication.

The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant pedagogical approaches, how to apply practical aspects of PTC theory, and how to design assignments. Each chapter includes a scenario or personal narrative of teaching a particular topic, provides a theoretical basis for interpreting the narrative, illustrates the practical aspects of the approach, describes relevant assignments, and presents a list of questions to prompt pedagogical discussions. *Teaching Professional and Technical Communication* is not a compendium of best practices but instead offers a practical collection of rich, detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom.
